You want to open a folder but it opens to This PC? It's confusing, isn't it? But it's not just you, there are countless other users experiencing the same situation. Therefore, in today's **tips** section , let's learn about **the error of opening a folder on This PC** to learn how to fix this problem in detail.

## What is the error of opening a folder on This PC?

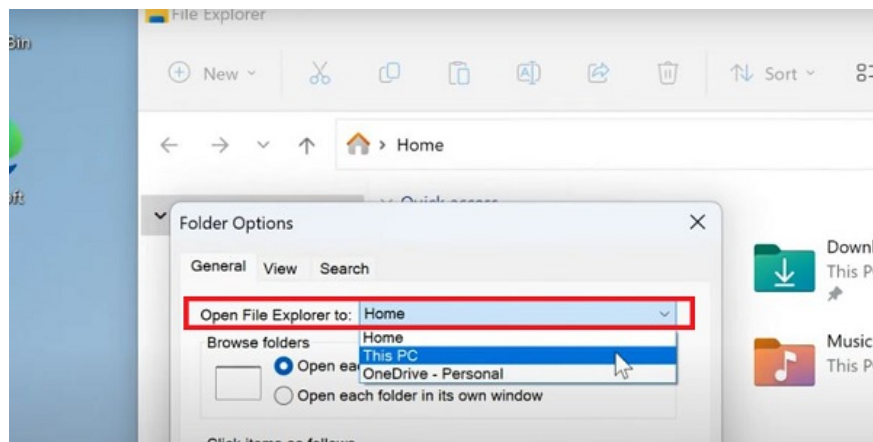

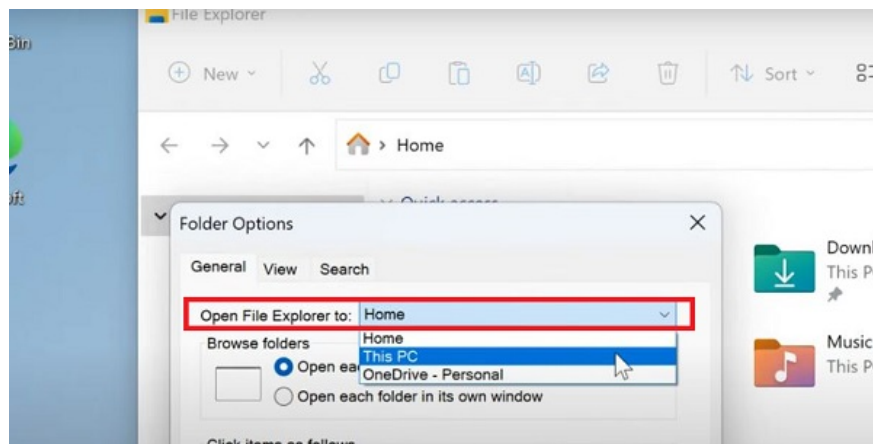

First, we need to understand this problem clearly so we can have appropriate remedies. Regarding the error of opening a folder in This PC win 10/11, countless users have encountered this problem.

Normally, in Windows 10 and Windows 11, when you click the File Explorer icon or press **Win+E**, this command opens the File Explorer home page. However, when the problem occurs, instead of the home page, every time you open File Explorer, it will appear This PC.

But don't worry because this is not an error. That's just because you have set up File Explorer to open according to the This PC option. If you want to change Home, it is not impossible. On the contrary, this trick is extremely simple.

### Instructions on how to fix the error of opening a folder to This PC on Windows 11 in detail

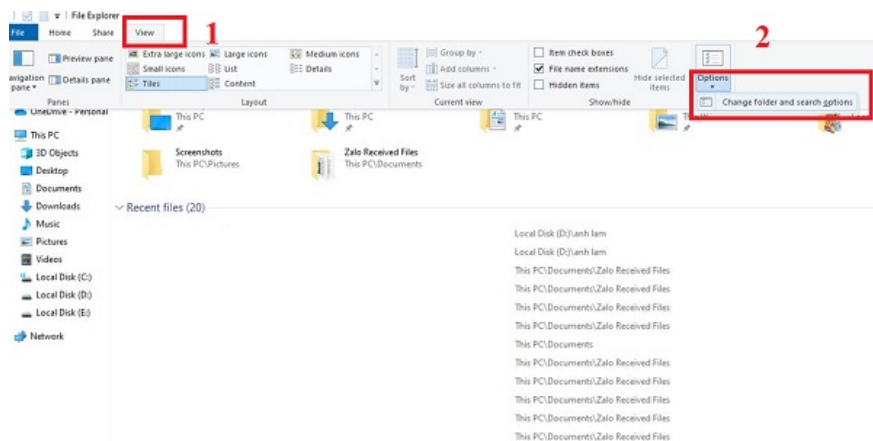

1. **Step 1** : The user opens **File Explorer** > Then, click on the 3 dots in the top corner > select **Options** .
2. **Step 2** : When the **Folder Options** panel appears> At the **Open File Explorer** line : Click the arrow and select **Home** . In addition, you can choose OneDrive if you want to see **OneDrive** every time you open the Folder !
3. **Step 3** : After selecting, click **Apply** > Click **OK** to close the window.

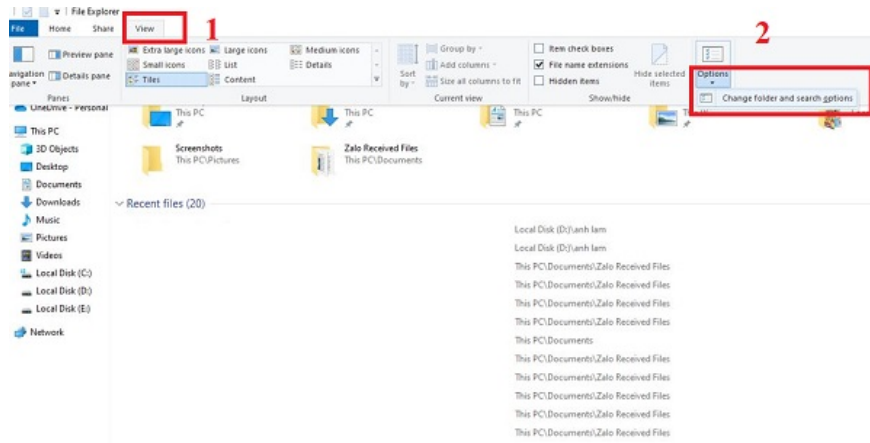

## Instructions on how to fix the error of opening a folder on This PC Windows 10

For Windows 10, the steps may be slightly different:

1. **Step 1** : You also press **Windows + E** to open File Explorer > Then, on the toolbar, click the **View** tab > Click the **Options** arrow > Select **Change folder and search options** .

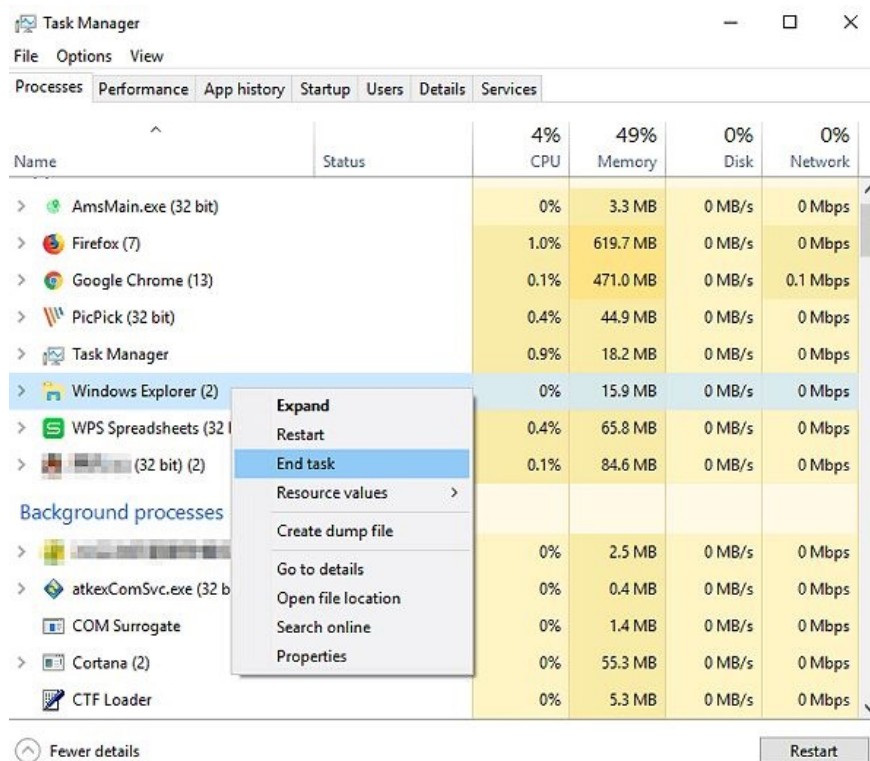

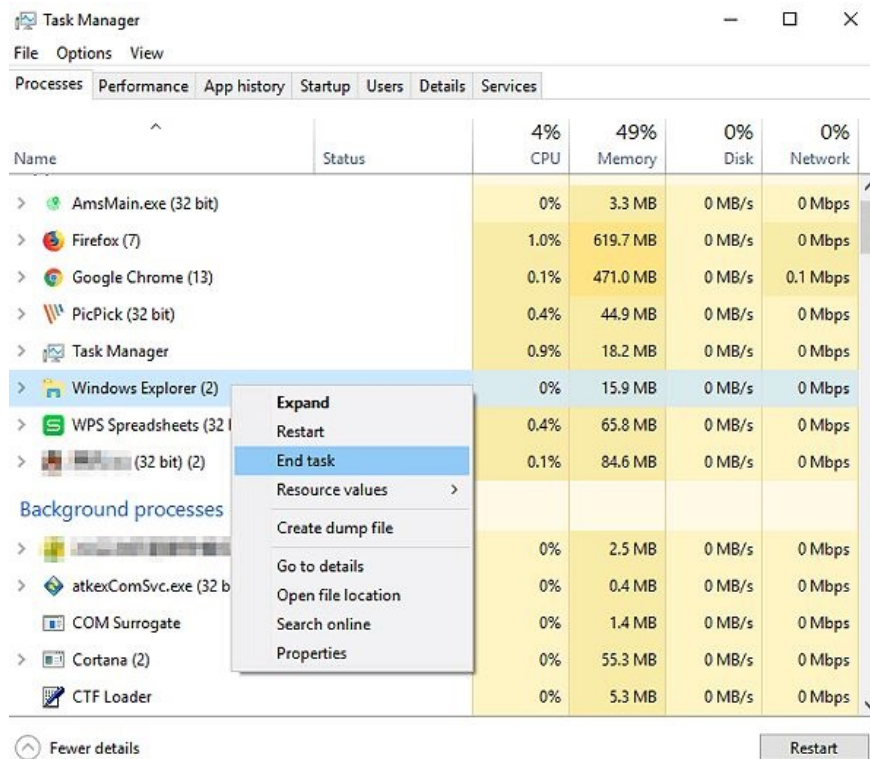

1. **Step 2** : After that, the Folder Options panel is also displayed> You also find the Open File Explorer section> Click on the arrow sign and select **Quick access** .
2. **Step 3** : Continue, click **Apply** > Click **OK** to open and complete this process.

## Instructions to fix the error of not being able to open a folder on Win 11/Win 10

In case you cannot open File Explorer, you can apply the solutions below to fix it:

### 1/ Restart File Explorer in Task Manager

1. **Step 1** : Press the key combination **Ctrl + Alt + Del** to open Task Manager > Then, find **Windows Explorer** .
2. **Step 2** : Right-click Windows Explorer > Select **End task** .
3. **Step 3** : Then, look at the toolbar above > Click the **File** tab > Select **Run new task** .
4. **Step 4** : When the dialog box appears, enter **explorer.exe** and press **Enter** .

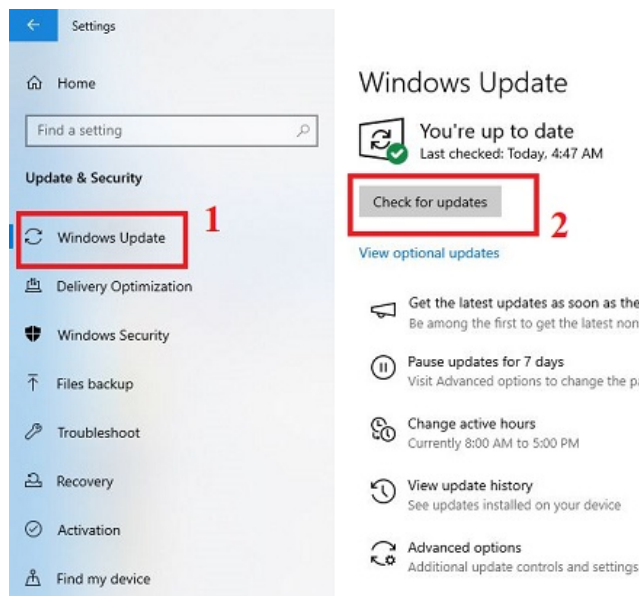

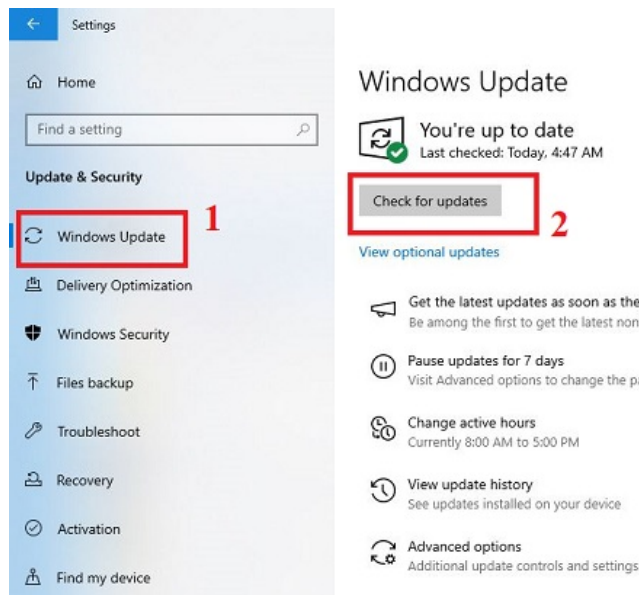

## 2/ Update Windows

Updating the operating system is also an operation you should not ignore. Because new updates always resolve known Windows-related issues, which may contain the 'Windows 10 File Explorer cannot open from Taskbar'

status.

1. **Step 1** : Press the key combination **Windows + I** to open Settings > Click on **Update & Security** .
2. **Step 2** : Click Windows **Update** > Click **Check for updates** > If there is a new update available, update it immediately!

### 3/ Restart your computer

To make sure any pending updates are installed, you need to restart your computer. Then, open File Explorer and see if the Folder can open properly as usual. Because it's also possible that this is just a minor problem and restarting will help you fix the error quickly.
