

Firefox 28 Beta 'shed' with the modern interface

Firefox 28 Beta contains two Desktop and Modern UI modes simultaneously. Desktop is a traditional interface like previous versions of Firefox, the new Modern UI interface is a new improvement, which helps optimize the touch screen.

Firefox 28 Beta contains two Desktop and Modern UI modes simultaneously. Desktop is a traditional interface like previous versions of Firefox, the new Modern UI interface is a new improvement, which helps optimize the touch screen.

In Modern UI mode, users will work full screen, large buttons clearly like many other applications also have a Modern UI style design.

In particular, users can quickly switch between Desktop and Modern UI modes quickly, by going to Firefox, selecting **Relaunch into Firefox for Windows 8 Touch** from Desktop mode, or vice versa from Modern UI mode. .

Firefox 28 Beta is available for free at **this address** . This is an online installation so the computer must have an Internet connection when installing.
