

Firefox 57 adds the option for Tracking Protection

Firefox 57 - next week's release, adds a new option to enable users to enable Tracking Protection at all times, not just in private browsing mode (Private Browsing mode).

Firefox 57 - next week's release, adds a new option to enable users to enable Tracking Protection at all times, not just in private browsing mode (Private Browsing mode).

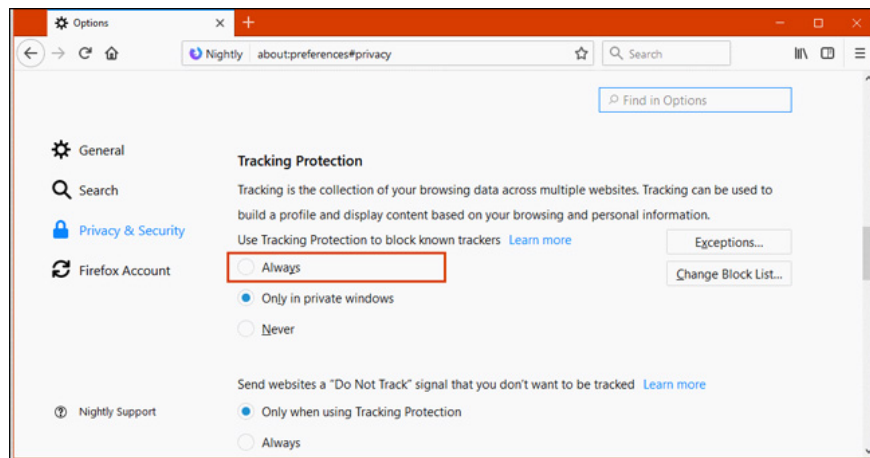

Tracking Protection is a feature that Mozilla has added to Firefox Desktop and Firefox Android in the summer of 2015 when it released Firefox 42. This feature works by blocking download tracking scripts similar to ad blockers, but there are The only difference is that it can allow ads to show if they don't track users.

1. Firefox 57 protects users from snooping applications

Tracking Protection is available in Firefox Nightly

According to the Firefox bug tracker, Mozilla added an option in the Firefox settings section that allows users to enable Tracking Protection at all times, even in normal browsing mode.

This new options page is available for experienced users in Firefox Nightly.

If you don't want to wait until Firefox 57 appears, you can turn on the new interface now by typing "about:config" into the URL bar, searching and double-clicking the "privacy.trackingprotection.ui.enabled" option. "

Mozilla has also implemented two private features from the Tor browser, such as the ability to block websites that try to get user fingerprints using fonts (added in Firefox 52) and HTML5 canvas tags (to be added). add in Firefox 58).

The option of always using Tracking Protection anti-tracking feature will be an important part of Firefox 57, this groundbreaking version also replaces most internal tools and removes old utilities and at the same time redundant. benefit from additional technology WebExtensions compatible with Chrome.
