Let's fire a fireworks to welcome the New Year of the Year of the Year 2010 with a fast-paced game with fun graphics and a fun sound to create beautiful fireworks displays at famous landmarks. world.

Fireworks on Android phones

On Android phones you have a lot of options to fireworks, there are applications that are simply fireworks displays, there are applications that allow you to adjust the speed yourself, the number of cannons appearing on the screen, yes Firework app comes with a few more games related to fireworks.

1. Fireworks 2018: This is simple but pretty real firework application, from sound to image. You can choose to fireworks with many colors or just one color. Unfortunately, the application does not select the fireworks location, you can only use a single wallpaper.
2. Real Fireworks: This firework application is more beautiful than the 2018 Fireworks, but the image is not as realistic. The application does not automatically fireworks, you have to click the screen to start firing, the number of cannon and firing speed depends on your hand gestures. The sound and images that the application brings on the phone will definitely help you get the familiar feeling in every New Year's Eve.
3. Fireworks Arcade: This fireworks application is essentially a show for you to have an fireworks show available, you just need to sit quietly and enjoy without doing anything. Fireworks Arcade also includes some interesting games, such as cutting fireworks to help you relax while waiting for the sacred season to be delivered.

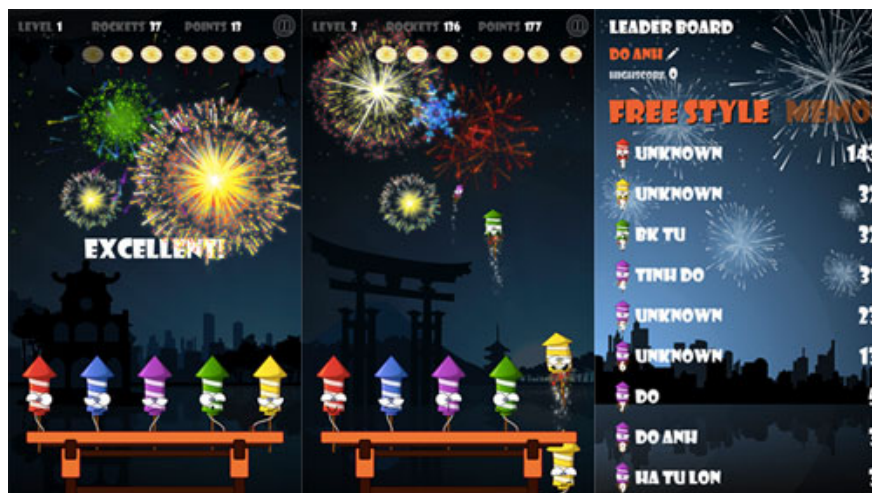

In addition, on Android phones, you can search in Google Play Store with the keyword "Fireworks" will result in applications of fireworks, fireworks wallpaper, exciting new year application.

Fireworks on iPhone

The Fireworks app on the iPhone is "remote", and after a while, Fireworks Arcade also has a version for the iPhone. Also, you can refer to Fireworks !!.

Fireworks on Windows Phone

If you are using Windows Phone, you will have the opportunity to experience the famous Rocket Fireworks fireworks application.

1. Free style: Game Fast-paced eyes - You must rely on the color of the lantern that appears on the screen to choose the right fireworks color.
2. Memory: Game Memory - For each turn, you have to remember the number of lanterns that appear in color and shoot in that turn.
3. Kid: Game title Hand-beating - Take the rhythm of the cannon that appears and shoot as fast as possible to shoot the most cannon.

With 3 styles to play with the classic fireworks displays created by yourself and do not forget to compare with friends with global rankings.
