Fishing Guide in Play Together

Go to Plaza (Kaia Island). Tap the phone icon on the left side of the screen, then tap Maps.

List of locations on the Kaia Island map

Under the Plaza map, search for Fishing Shops using the list of areas on the right side of the map and tap.

Next, tap the Navigation button in the lower left corner of the screen. An arrow will appear below the character, facilitating easy movement to the store.

Follow the arrow to reach the store located near the Ferris wheel. Move closer to the shopkeeper and tap the cart icon (in the speech bubble) above him.

Click the Buy fishing rod button in the lower right corner of the screen and choose the most basic wooden stick. It is cheap (450 stars) and is suitable for those who are new to fishing.

Buying a fishing rod from the store is the first step to getting ready to fish

Now go back to the map and tap the pier below the list of places on the right. Players do not even need to use the map to get to the pier because it is very close to the fishing shop and the ferris wheel.

Next to the pier there is a jetty - an ideal spot for fishing. Go to the edge of the dock, close to the water, and tap the red backpack on the right side of the screen. Next, select the closed umbrella icon to open the tools section.

Click on the fishing rod to equip, a new action will be displayed in the lower right corner of the screen, just above the jump button. People touch it to start fishing.

Players need to focus and stay calm when they see the fish's shadow approaching the bait

The most important thing when fishing is patience and always keep an eye on the water. Players can drag their finger to zoom the image.

Immediately after seeing the shadow of a fish near the bait on the surface of the water, an exclamation mark will appear nearby as an indication that the fish has seen the bait. After this signal, the fish will come closer to the bait but sometimes it just appears for fun and does not announce anything.

An exclamation mark appears to indicate that the fish has seen the bait. But when people see it moving faster and faster, accompanied by a loud sound of the reel spinning, it's time to fish. Click on the fish and fishing rod icon in the bottom right to pull up.

In the beginning, fishing will not be easy and people need a lot of practice to catch fish. Remember that when the fish clings to the bait and moves quickly, it is the right time to catch, but many people even then cannot catch the fish.

Fishing is not an easy task, players need to practice a lot to succeed. Fishing requires players to time themselves and should not pull the rod too early or too late when the sound of the reel is heard. Fishing has no time limit and people can catch fish at any time without any pressure.

After successful fishing, players can sell it or put it in the fish tank for display

Once successfully caught, tap the Store icon to store the fish. Now go back to the shop, click on the cart button above the boss and select the sell button. Tap the recent catch and then the blue button at the bottom to sell.

Players can catch fish anywhere there is water, whether it's a pier or a swimming pool. The swimming pool is located near the fashion mall. There is a staircase next to the mall leading to the swimming pool. People can refer to the List and Common Places of Rare Fishes in Play Together to make it easier to find rare fish.
