Modify the ForegroundLockTimeout registry value

Since this is a registry related operation, you should back up the registry or create a system restore point to prevent problems from occurring. Once done, you can proceed as follows:

1. Press **Windows** key + **R** to bring up the **Run** dialog box .
2. In the **Run** dialog box , type **regedit** and press **Enter** to open Registry Editor.
3. Navigate to the registry key path below:

Computer\HKEY_CURRENT_USER\Control Panel\Desktop

1. On the right side, double-click the **ForegroundLockTimeout** entry to edit its properties.
2. In the **Properties** window , select **Decimal** under **Base**.
3. Then set the **Value data** to **0** .
4. Click **OK** to save the changes.
5. Exit Registry Editor and restart the device.

At startup, check to see if the issue is resolved. If Alt + Tab still doesn't work, try next solution.

3. Modify the AltTabSettings registry value
