

Fix Aw Snap errors on Google Chrome in 4 ways

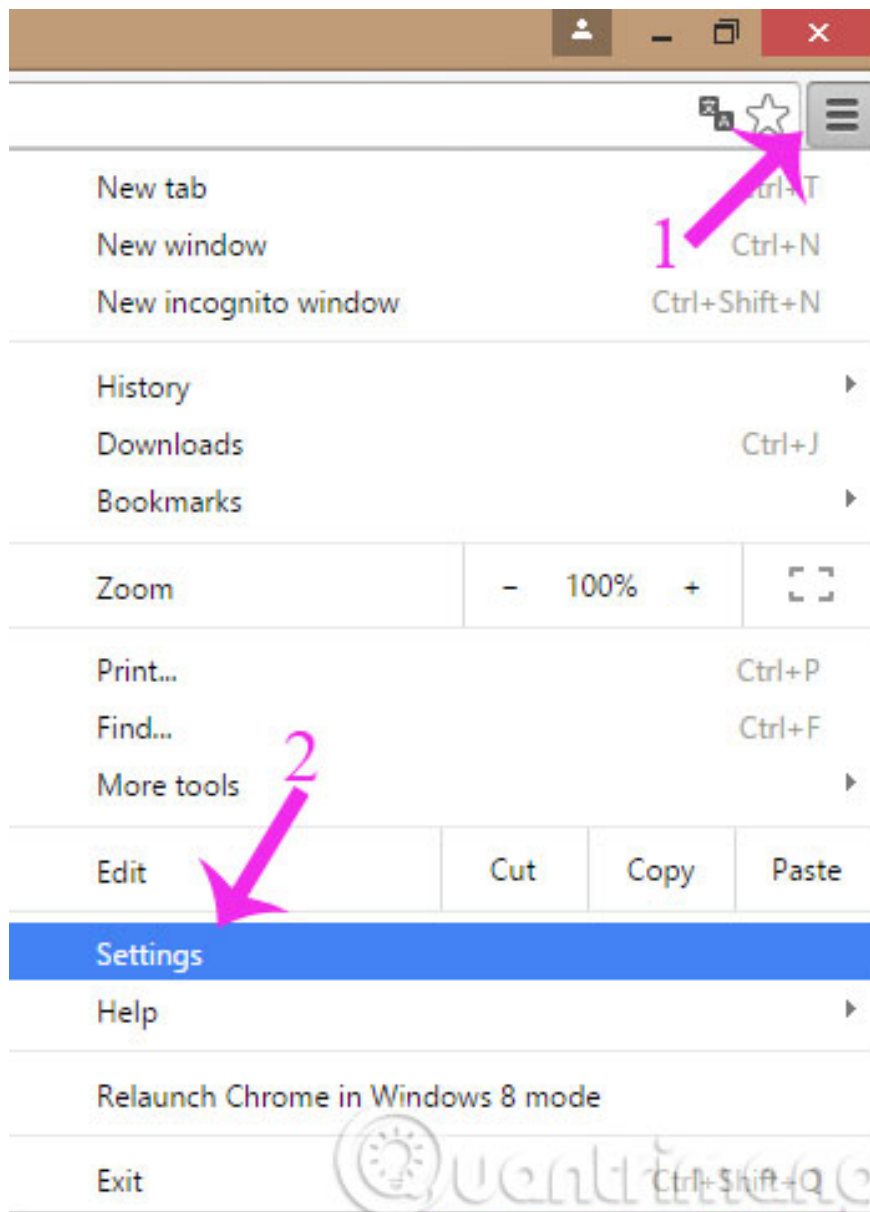

Aw, Snap is one of the common errors when accessing the Web with Chrome browser. This error occurs mainly because Chrome cannot access a website and users usually just need to Refresh again. However, if F5 is continuous, it is still not possible, then you can refer to the instructions below of TipsMake.com.

Aw, Snap is one of the common errors when accessing the Web with **Chrome** browser. This error occurs mainly because Chrome cannot access a website and users usually just need to Refresh again. However, if F5 is continuous, it is still not possible, then you can refer to the instructions below of TipsMake.com.

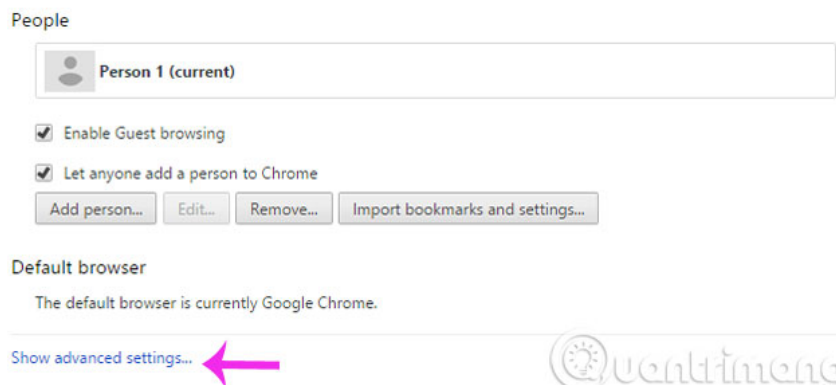

Method 1: Change the font

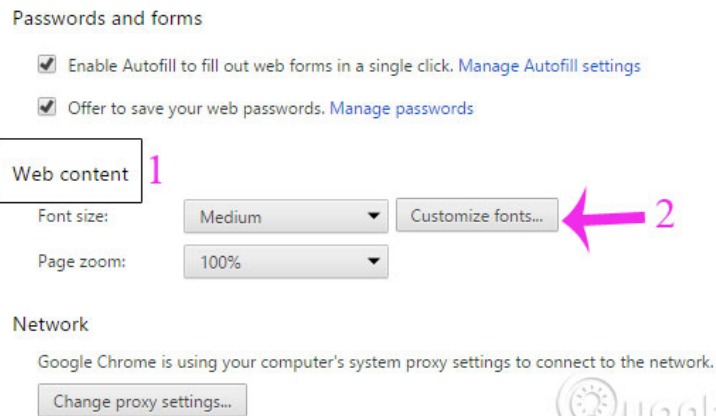

Step 1 : Open Chrome browser, click 3 dash icon and select **Settings**

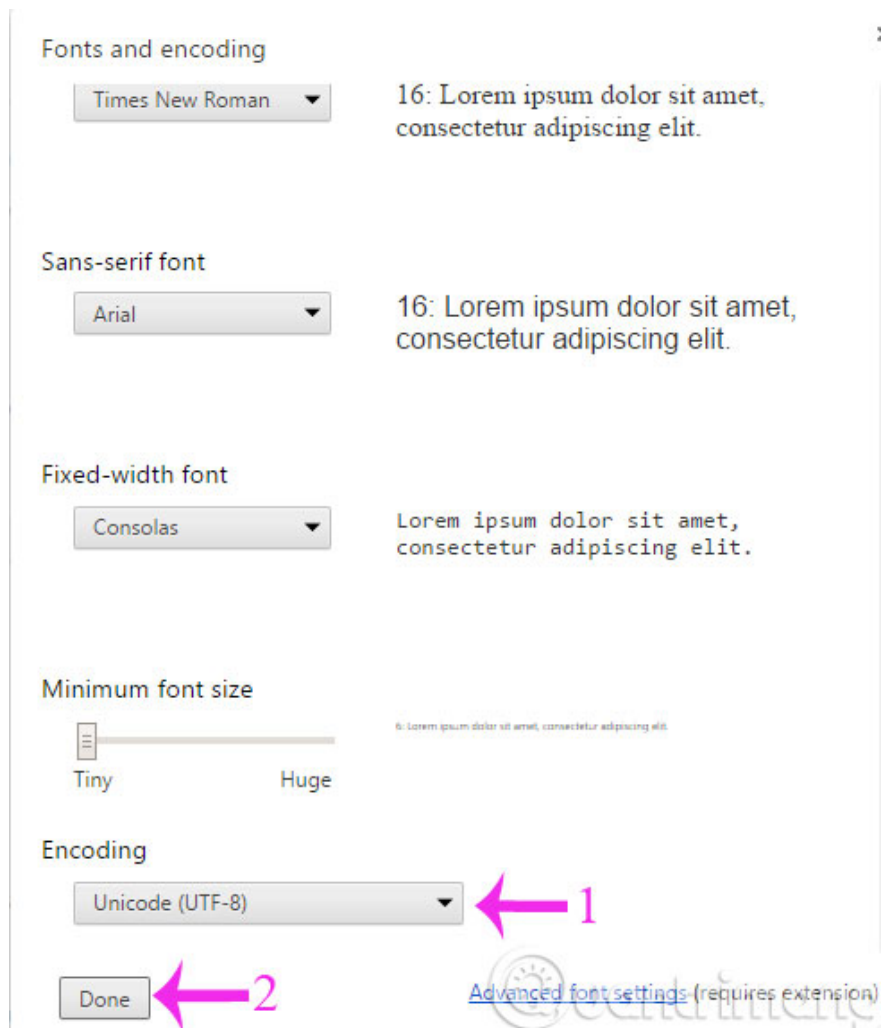

Step 2 : In the **Settings** interface, click on the link **Show advanced settings** .

Step 3 : Find the **Web content** section and click **Customize fonts** . button

Step 4 : When the **Fonts and encoding** dialog box opens, select **Unicode (UTF-8)** in the **Encoding** section and click **Done**.

Method 2: Access on incognito window

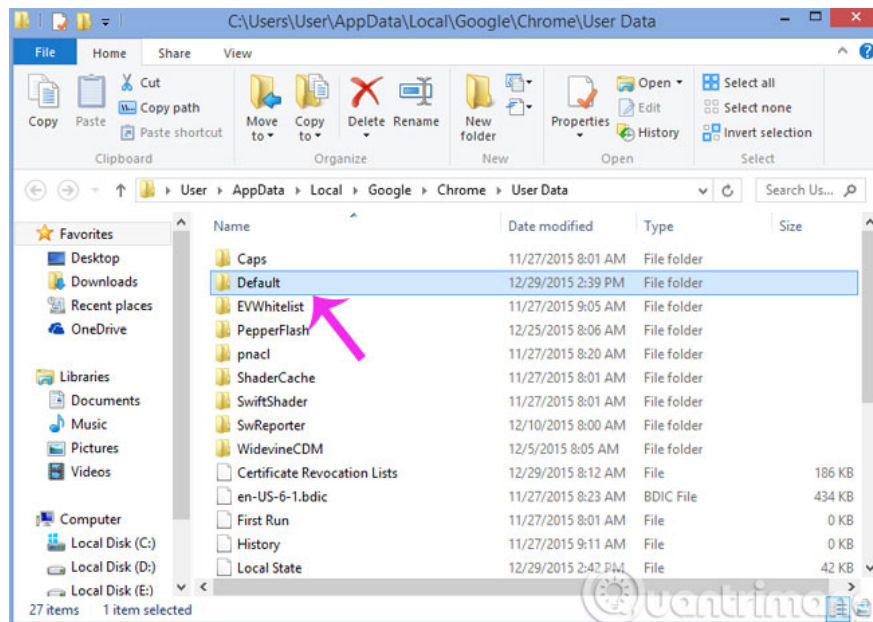

You open an incognito window (*Ctrl + Shift + N*) and then try to visit the website that crashed. If access is normal, it is very likely that a certain extension of your extension is faulty and needs to be removed.

Method 3: Create a new profile

The main cause of Aw Snap error may be due to the user's Profile error during use. Therefore, the best way you should create a new Profile. First open the **Run** dialog box

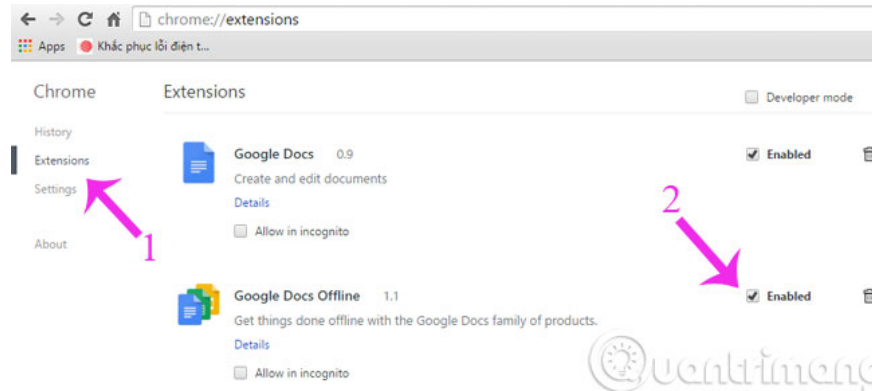

1. **Windows XP** :% USERPROFILE% Local SettingsApplication DataGoogleChromeUser Data
2. **Windows Vista / Windows 7 / Windows 8** :% LOCALAPPDATA% GoogleChromeUser Data

Soon, the **User Data** window will appear, you find the file named **Default** and rename it to **Backup Default** .

Then restart your Chrome browser. At this point, another new Default folder will automatically be created.

Method 4: Turn off unnecessary utilities

Visit **chrome:// extensions** and select the **Extensions** menu. After that, you can turn off or uninstall utilities that are not really useful.

Method 5: Review whether to install conflicting software

Some software may cause conflicts with Chrome recommended by Google such as Venturi Firewall, WinMount, PPLive, NVIDIA network access manager, NVIDIA NTune, IS3 Anti Spyware, SpeedBit Video Accelerator, Folder Guide.

In addition, you can scan your computer for viruses with popular software like **Avira Free Antivirus 2016** , **AVG AntiVirus Free 2016** , **CMC AntiVirus** .
