# How to fix d3dcompiler\_43.dll error

**Note :** Do not download the d3dcompiler\_43.dll DLL file from any DLL download page. There are several reasons that downloading DLLs from these sites is not a good idea.

If you downloaded d3dcompiler\_43.dll from one of those DLL download pages, delete it and continue with the following steps.

1. Restart the computer if you have not done so already. The d3dcompiler\_43.dll error may be a minor error, and since rebooting is a common fix for many computer problems, it can completely erase this DLL error.

2. Install the latest version of Microsoft DirectX. Yes, upgrading to the latest DirectX version will fix the "d3dcompiler\_43.dll not found" error, but if not, try Runtimes DirectX End-User Runtimes instead.

**Note :** Microsoft usually releases updates for DirectX without updating the version number or letters, so be sure to install the latest release. The same DirectX setup program works with all Windows versions, including Windows 10, 8, 7, Vista, XP, etc. It will replace any missing DirectX 11, DirectX 10 or DirectX 9 files. come on.

## 1. [How to check the DirectX version on Windows](#)

3. Assuming the latest version of Microsoft DirectX doesn't fix the d3dcompiler\_43.dll error you're experiencing, look for the DirectX installation program on the DVD or CD for the application or game. Typically, if a game or other program uses DirectX, software developers will include a copy of DirectX on the installation disc. Sometimes, the version of DirectX included on the disc is more suitable to the program than the latest version available online.

4. Uninstall the game or software program and then reinstall it. Something may have happened to the files in the program that work with d3dcompiler\_43.dll, and reinstalling might be helpful.

**Tip:** If this doesn't work, it's possible that not all program files have actually been deleted or some registry entries related to the DLL file remain, and that is the cause of the error even after installation. reset software. Try again with the free uninstall tool and see if that fixes the d3dcompiler\_43.dll error message.

5. Restore the d3dcompiler\_43.dll file from the latest DirectX software package. If the above troubleshooting steps do not resolve the d3dcompiler\_43.dll error, try extracting the d3dcompiler\_43 DLL file from the DirectX download package.

6. Update driver for video card. Although this is not the most common solution, in some cases, updating the video card driver on the computer can fix this DirectX problem.
