

# Fix IDM errors automatically download music on browsers

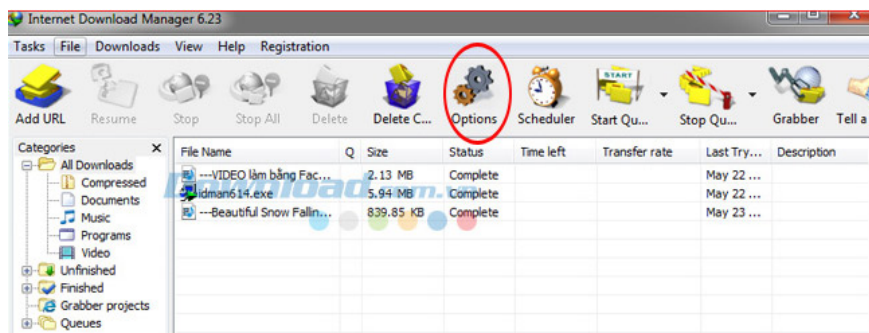

Every day when you go to the internet to listen to music or watch movies, every time you play music, your Internet browser will open the download window of Internet Download Manager and must turn it off. A few times it is okay, but this situation is going on continuously, making the user angry.

It's annoying that every time you go to a web browser to listen to music, the IDM automatically starts the link and the window starts to download. So how to overcome this situation? Let's take a look at this article and try it!

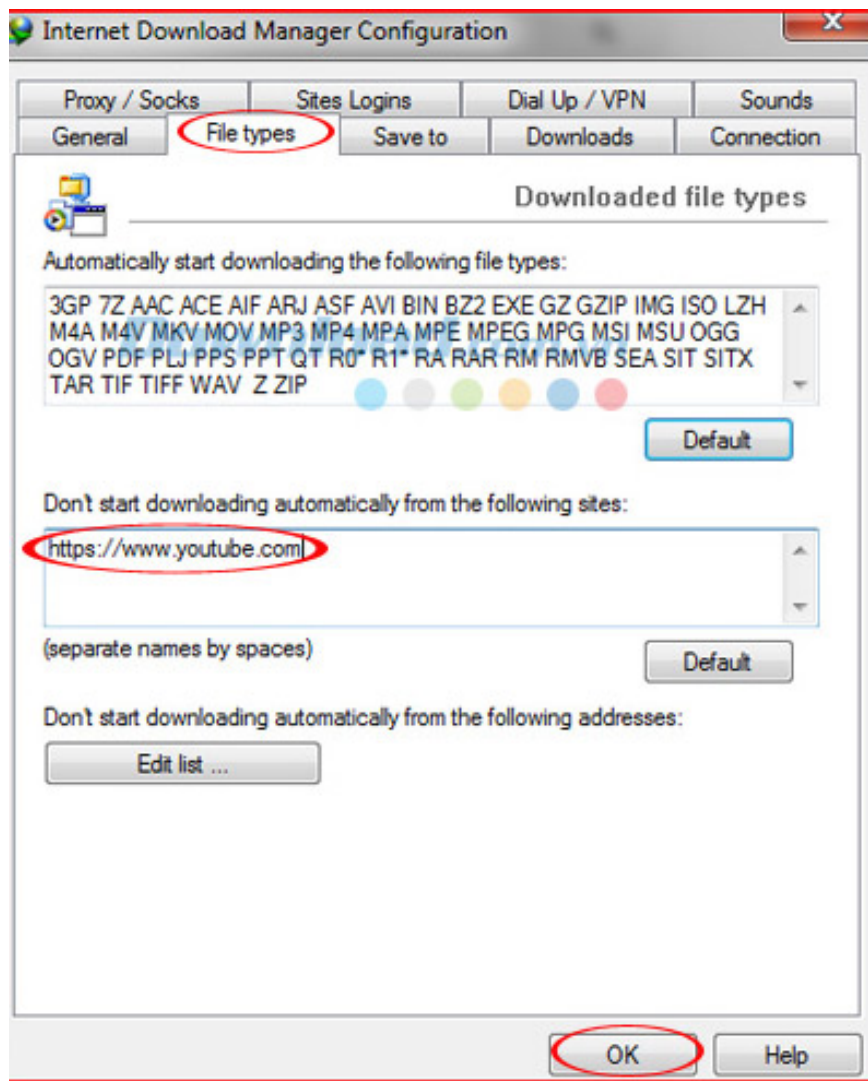

## Download the latest Internet Download Manager

### Fix Internet Download Manager error automatically download music

**Method 1:** Open **Internet Download Manager (IDM)** browser, select **"Options"** tab.

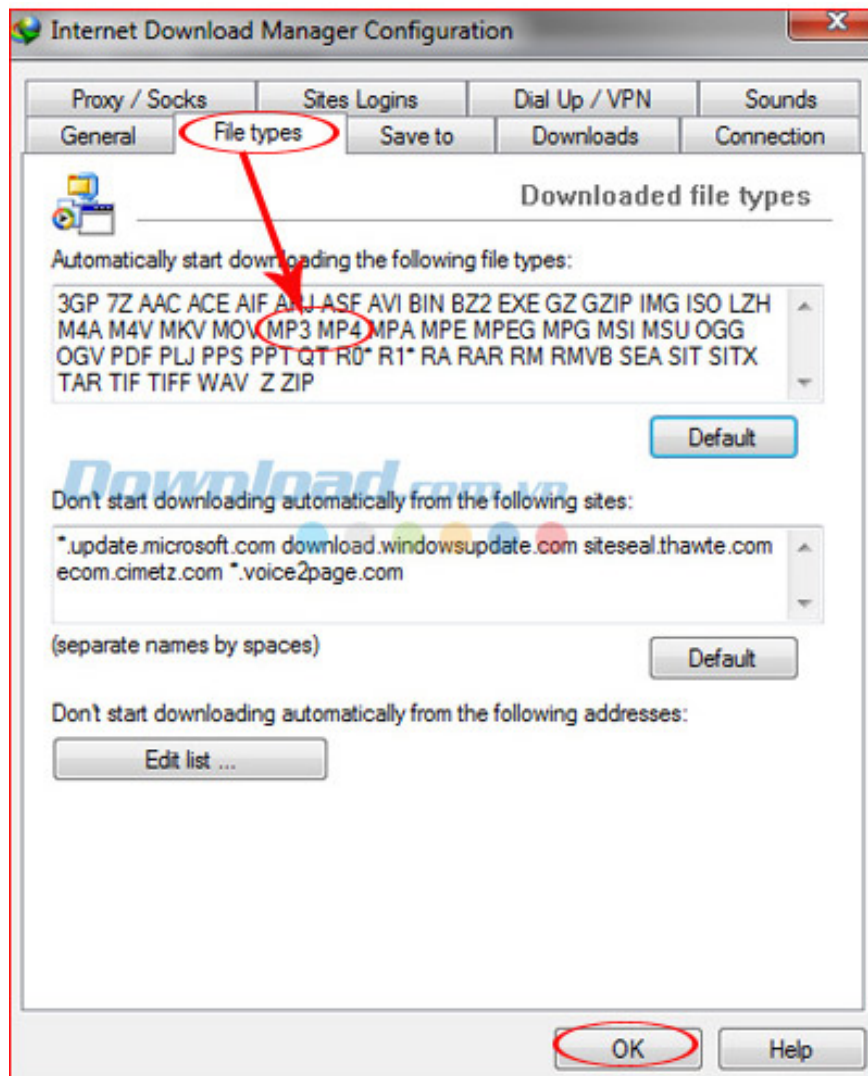

In the **Internet Download Manager Configuration** window, select the **"File types"** tab. Under the section **"Don't start downloading automatically from the following sites"**, you enter the address of the site that wants **IDM** to not automatically download music downloads. Enter finished and click **OK** below.

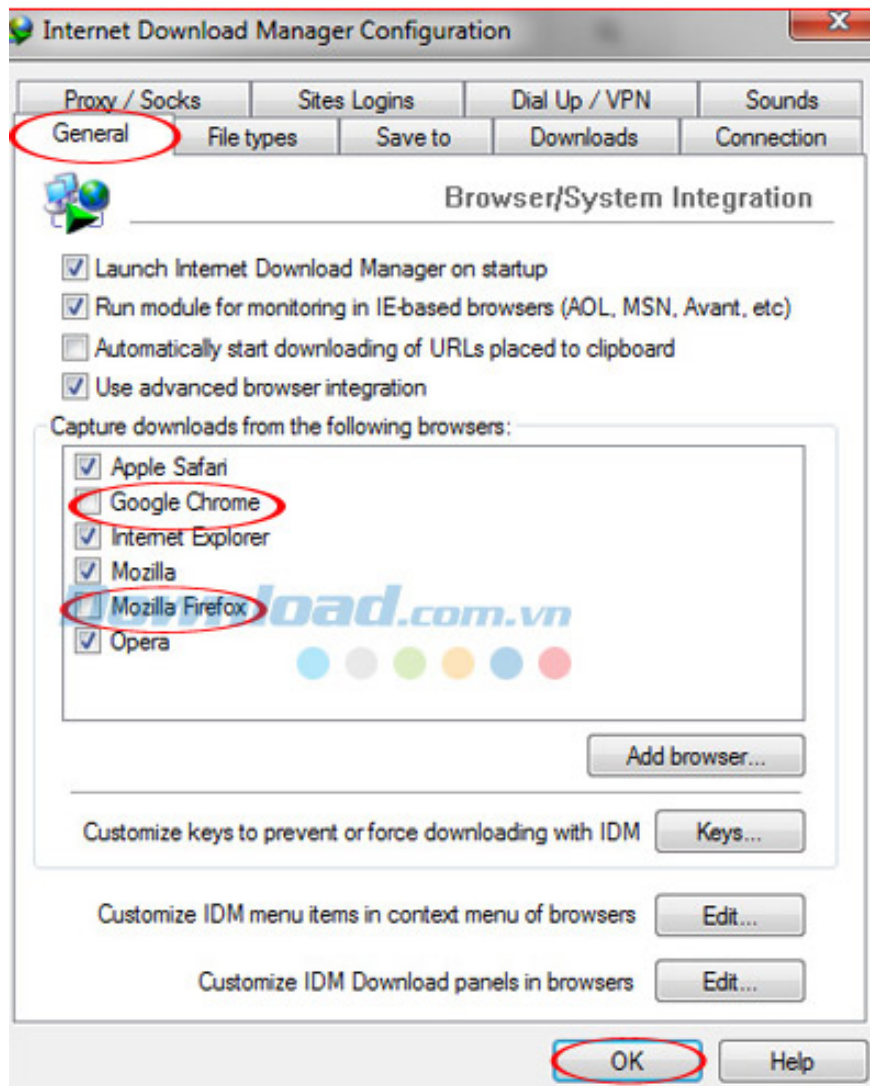

Enter Youtube address so that IDM does not download music on this page anymore

**Method 2:** Also in the interface of "**Internet Download Manager Configuration / File types**", go to "**Automatically start downloading the following the types**" section and delete the audio format extensions, such as: **MP3, MP4** . After That's **OK** to finish.

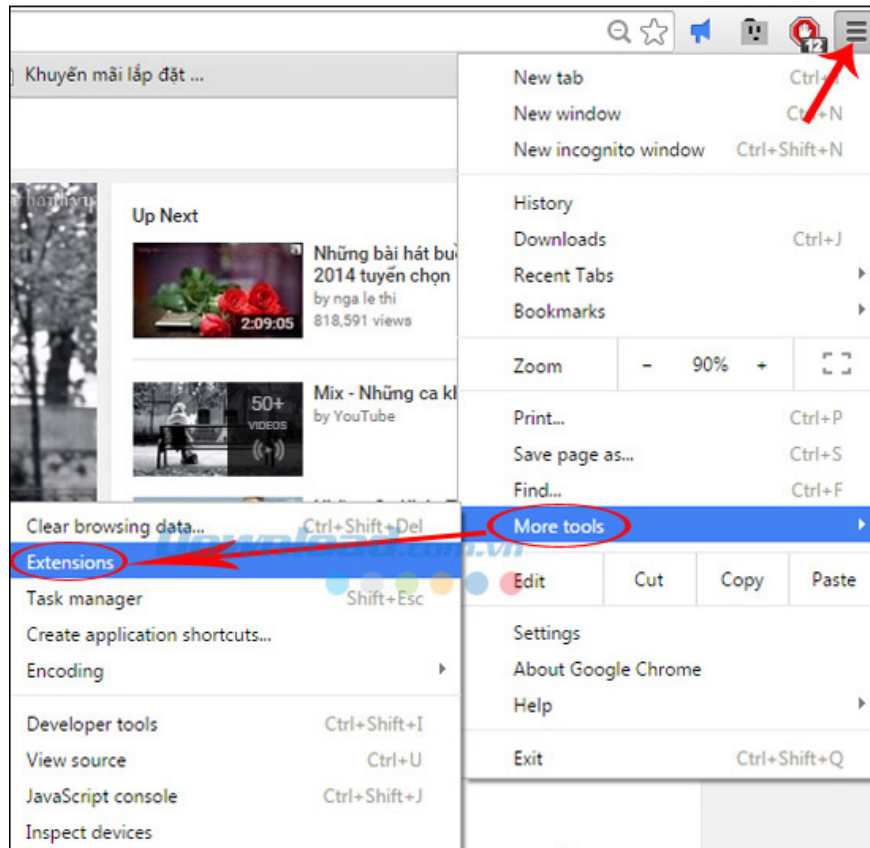

**Method 3:** Still in the interface of "Internet Download Manager Configuration" , but you select "General" . In the "Capture downloads from the following browsers" section , you will see the names of browsers such as **Apple Safari, Google Chrome, Internet Explorer, Opera, Mozilla Firefox** . please tick the boxes with the browser name that You are good, using **IDM** to not download on those pages anymore. Finished ticking, **OK** to finish.

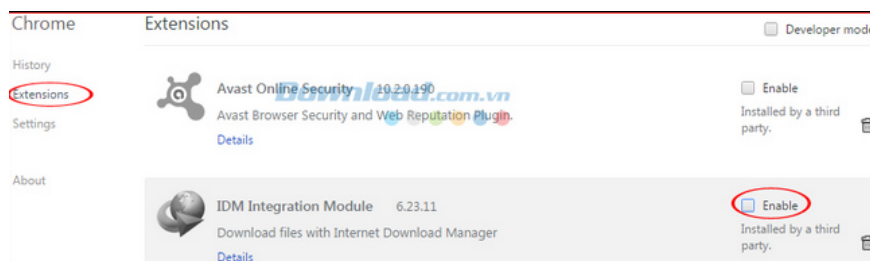

**Method 4:** Intervene in settings in browsers.

For **Google Chrome** , you do the following:

From **Chrome** 's main interface, click on the "**options**" icon (3 dashes) , then go to "**More tools**" , and click "**Extensions**".

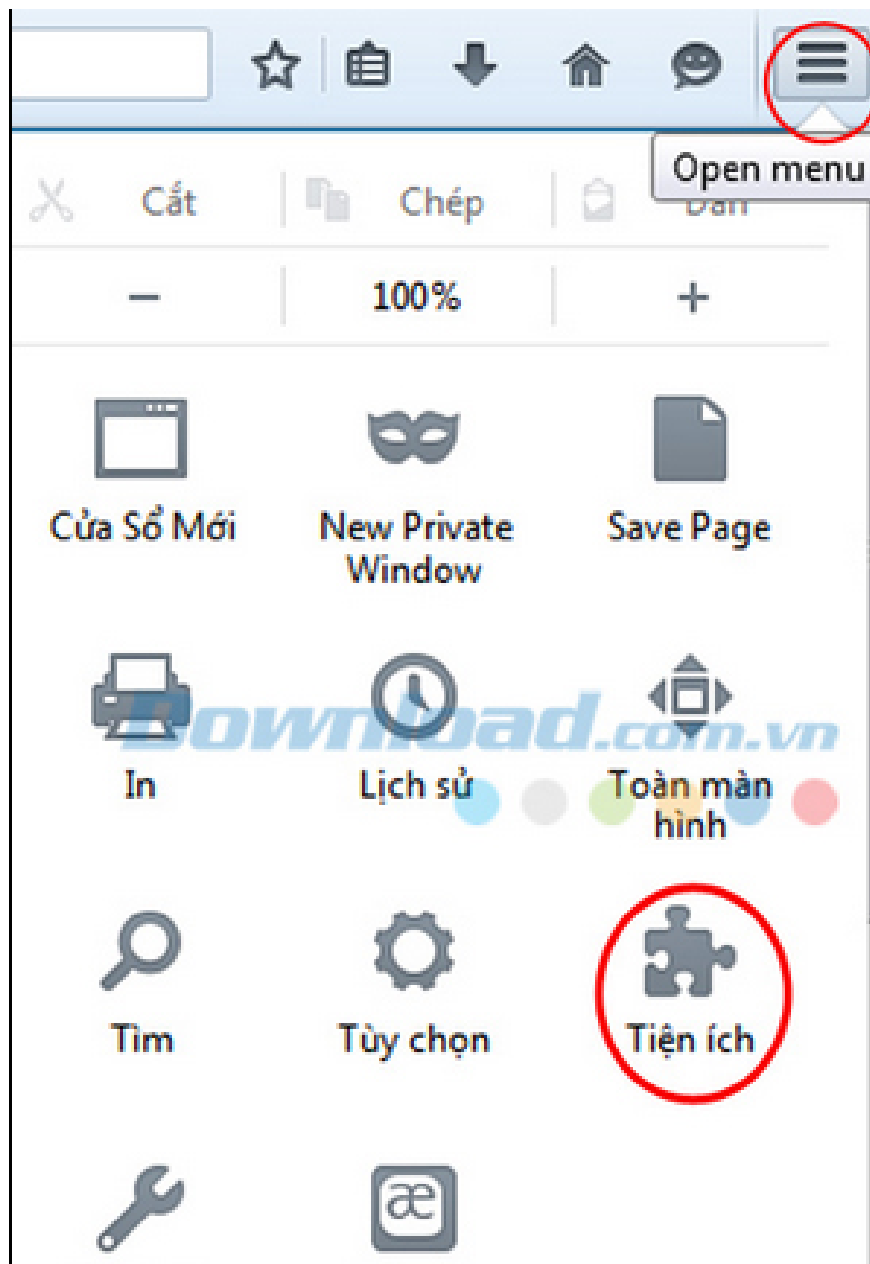

The **"Extensions"** interface appears, select the **"Extensions"** section . Here you will see applications, utilities that are being installed for your **Chrome** browser. Go to **"Internet Download Manager"** and uncheck the **"Enable"** checkbox to disable this application in the browser.

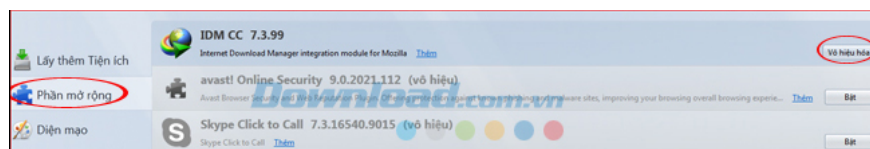

After removing the tick, IDM will be "fuzzy" like this

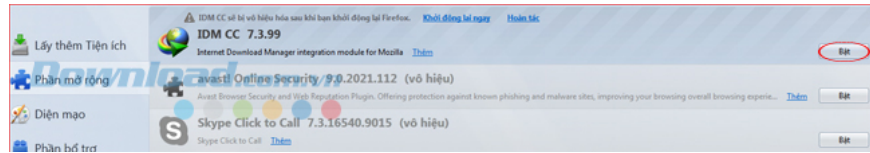

Similar to **Firefox** , you also go to the **"Menu"** icon (**3 dashes in the upper right corner of the interface**) . Select **"Add-ons"** (**puzzle piece icon**).

The "Add-ons" window appears, you select "Extensions" to see **IDM** appear in the list. Click the "Disable" button so that **IDM** cannot download automatically in **Firefox** .

IDM before being "disabled"

After "disable" IDM

After completing one of the above ways, you restart the browser so that you can listen to the music comfortably without the annoying error of bothering you.
