

Fix 'Installer Has Failed' error during WhatsApp installation for computer

Recently WhatsApp has just released a version for Windows 8/10 and Mac computers. However, during the installation of WhatsApp on Windows 8 as well as Windows 10, many users often encounter an 'Installer has failed'. Có l?i khi cài ??t ?ng d?ng. H?y ki?m tra Setup ?? ??ng nh?p ?? thêm thông tin và liên h? '.

Recently WhatsApp has just released a version for Windows 8/10 and Mac computers. However, during the installation of WhatsApp on Windows 8 as well as Windows 10, many users often encounter an 'Installer has failed'. Có l?i khi cài ??t ?ng d?ng. H?y ki?m tra Setup ?? ??ng nh?p ?? thêm thông tin và liên h? '.

So how to fix this error, invite you to refer to the following article of Network Administrator.

WhatsApp version for current computers is only "available" on 64-bit Windows

WhatsAppSetup

WhatsApp application for computers currently only supports 64-bit Windows 10 and Windows 8 operating systems. In other words, WhatsApp installation files do not support Windows 10/8 32-bit or x86 versions.

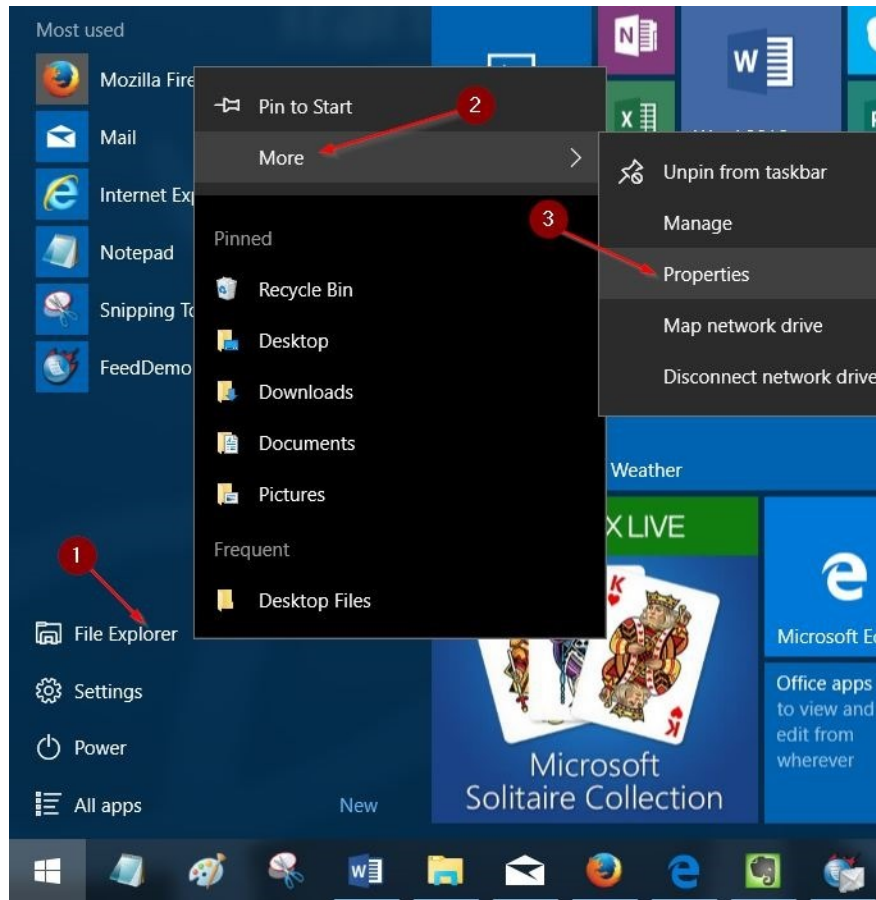

So before installing WhatsApp for Windows computers you should check that the version of Windows you are using is 64-bit or 32-bit.

To check if the version of Windows you are using is 64-bit or 32-bit, you can apply one of the following 2 ways:

1. Check Windows 10 version on System properties

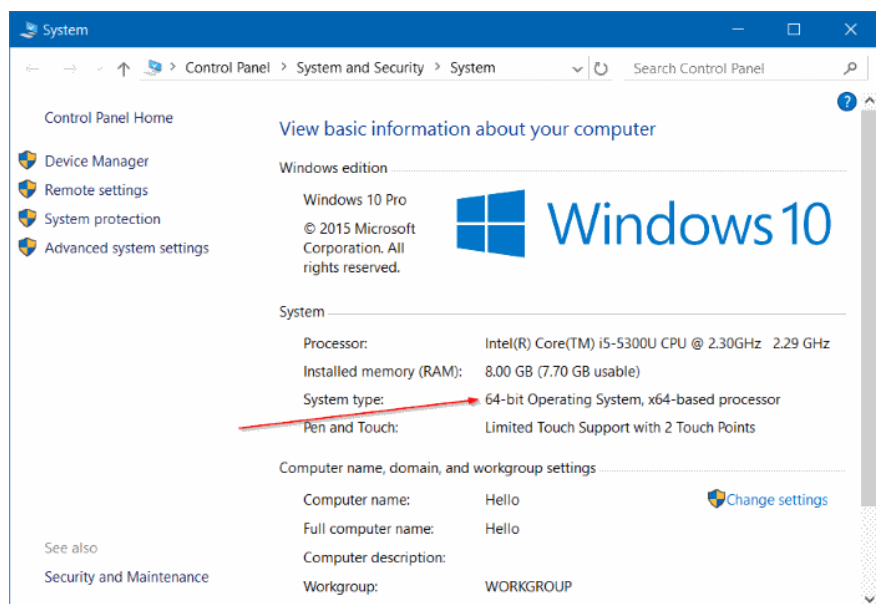

Step 1:

Right-click File Explorer on the Start menu, then click **More** then click **Properties** to open the System window.

Step 2:

On the Properties window, find the **System** section. Here you will see the version of the Windows operating system you are using is 32-bit or 64-bit in the **System type** option.

2. Through Settings settings

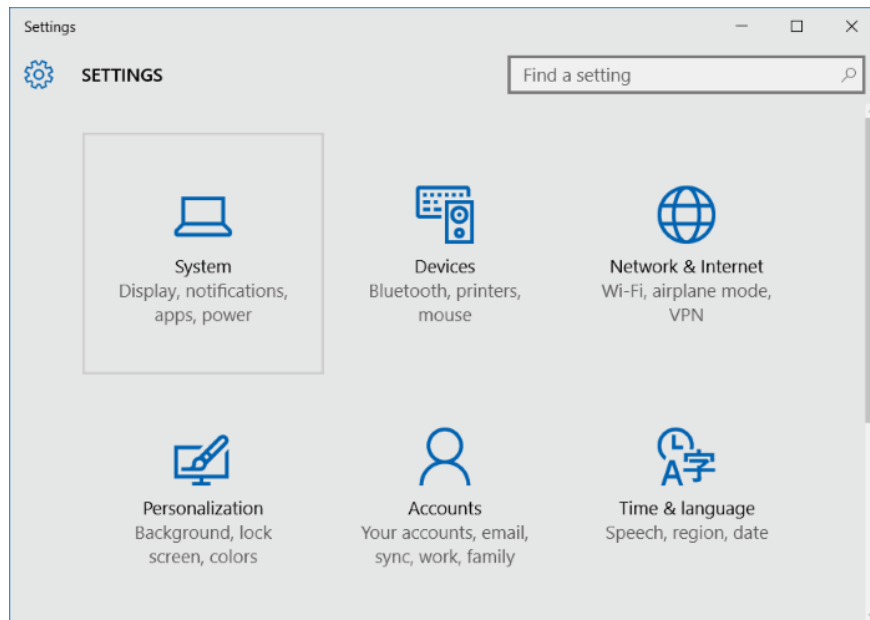

Step 1:

Open Settings settings by clicking the Settings icon on the Start Menu or pressing the **Windows + I** key combination.

Step 2:

On the Settings window, click on **System (Display, notifications, apps, power)** .

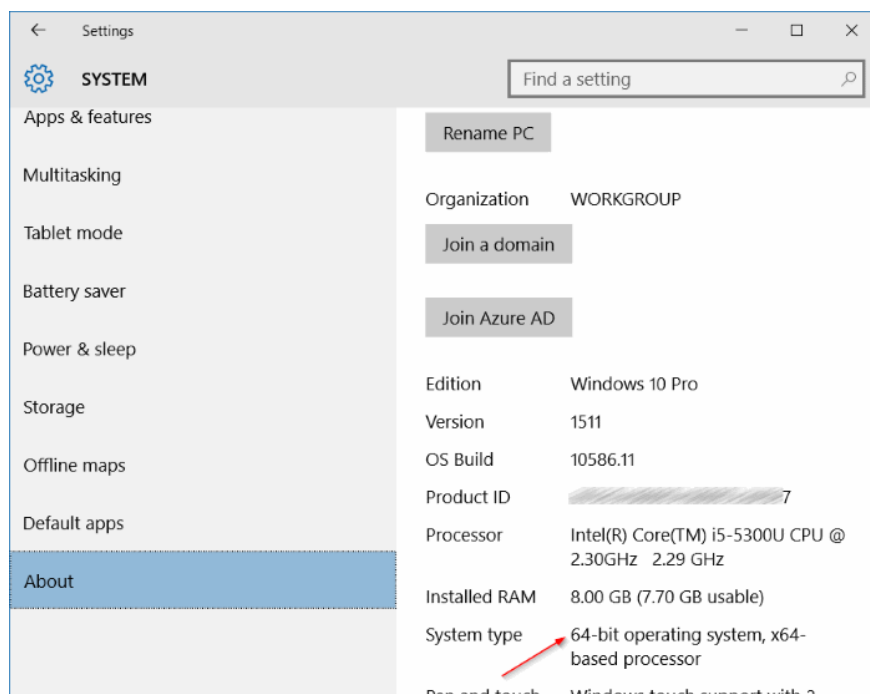

Step 3:

Next click on **About**.

Step 4:

Here you find the **System type** entry in the right pane to check the version of Windows you are using is 32-bit or 64-bit.
