

Fix printer error code 0x000006d9

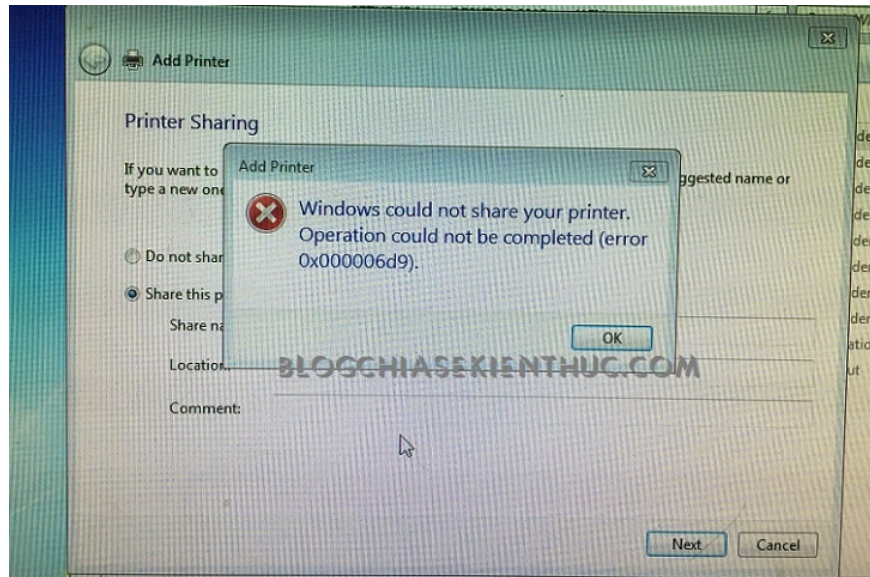

Error correction guide cannot share printer in LAN. Fix the error of not sharing the printer, fix Error 0x000006d9 when sharing the printer

During the process of installing and using the printer, you will probably encounter many errors. And one of them is probably error code **0x000006d9**, which usually occurs when you are using multi-configuration ghosts shared on the Internet.

The reason is that the author has disabled some unused services on the Windows operating system, in order to speed up Windows and reduce the size of the Ghost version. Because actually, a few of you who work on office computers, do printing-related jobs are only using these services.

Today I helped install the printer and got the error message as follows: Windows could not share your printer. Operation could not be completed (**error 0x000006d9**). Something like a printer can't be shared error.

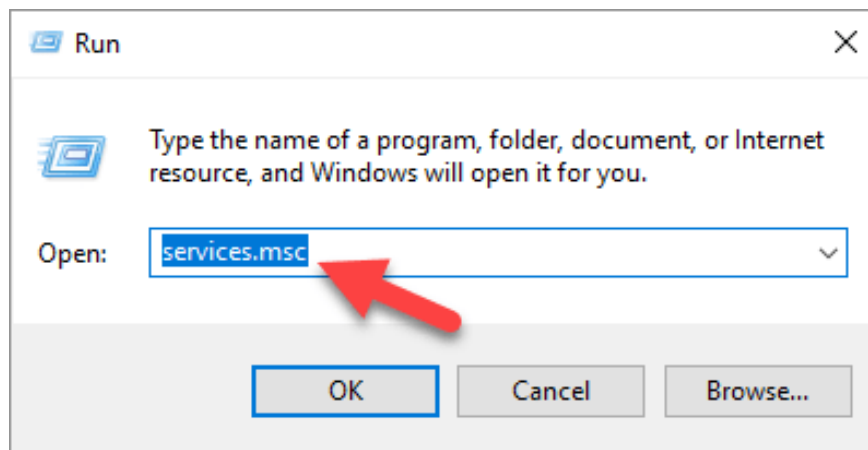

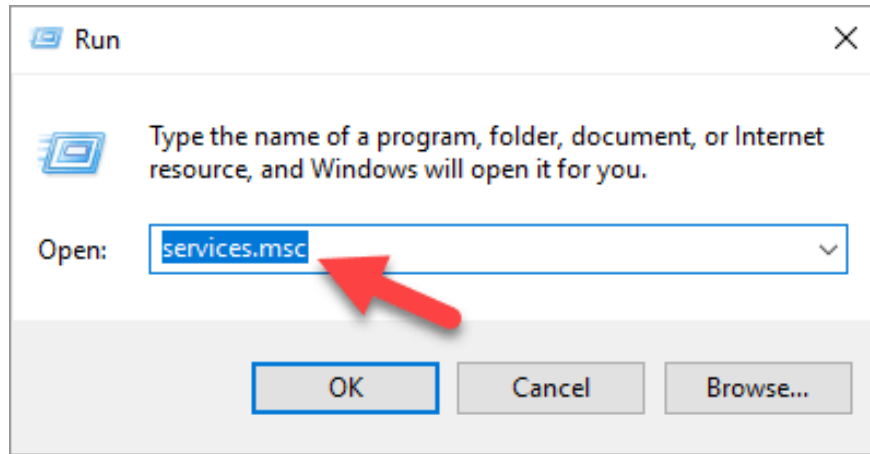

To fix this is also very simple, with just a few clicks, I have successfully fixed it. If you are having trouble sharing your printer to other computers on the same LAN, then this is a great article for you.

Fix the error of not sharing the printer (Error 0x000006d9)

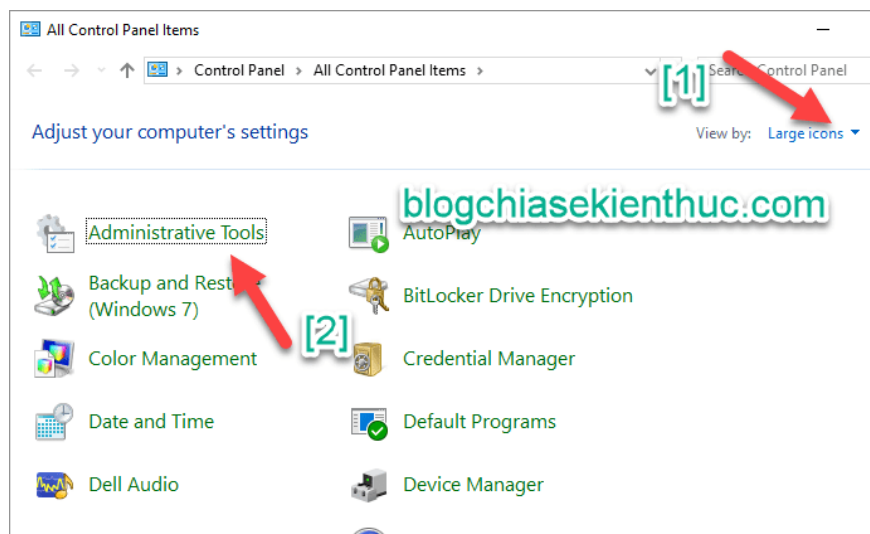

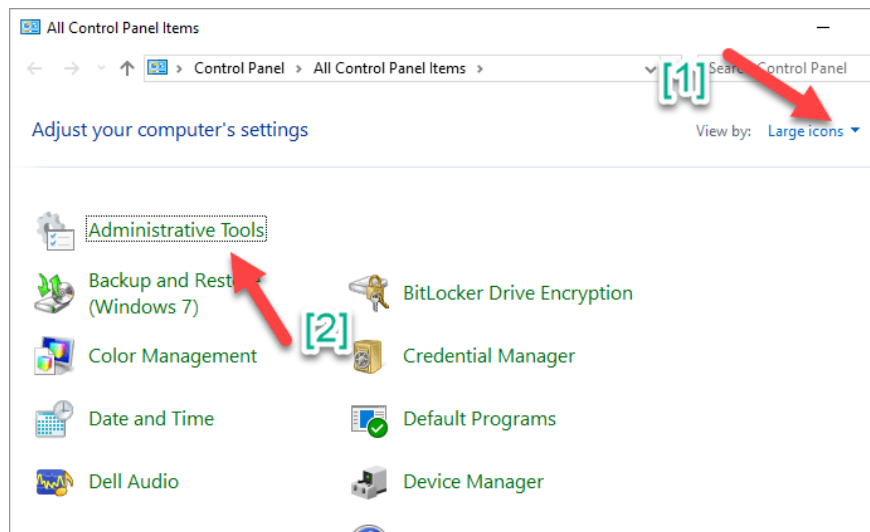

+ Step 1: Access to Services.

You can access it quickly by opening the Run dialog (Windows + R) => then typing services.msc => and pressing Enter.

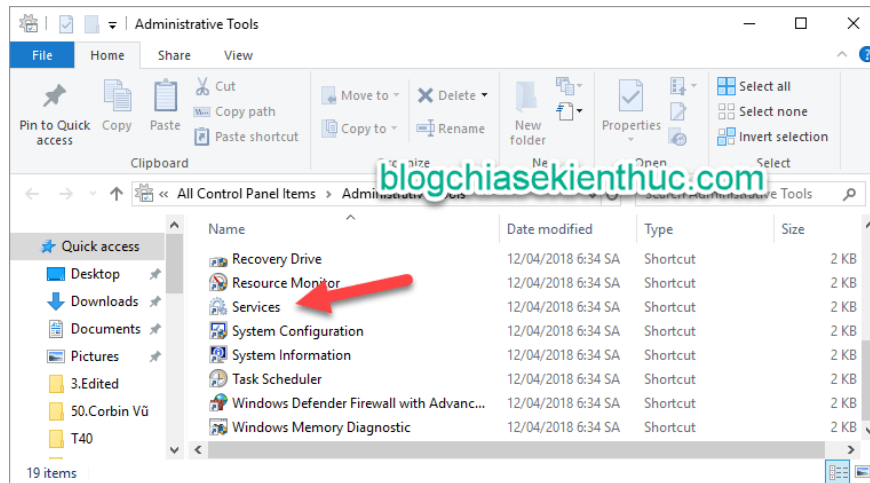

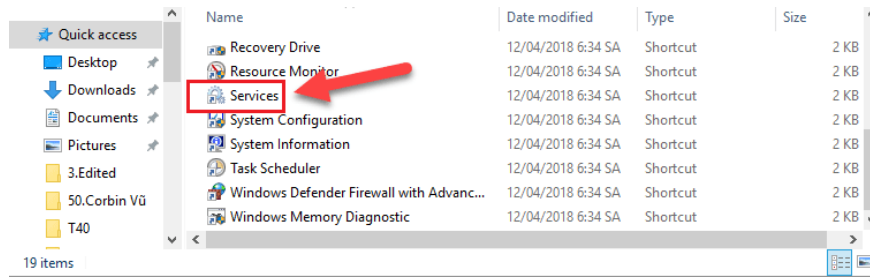

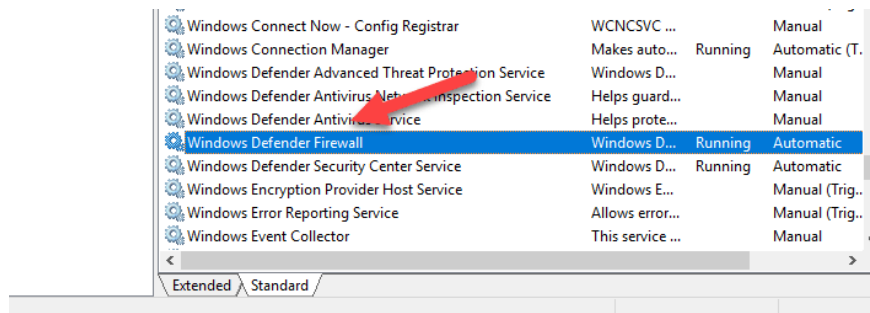

Or you can access it manually as follows: Go to Control Panel => then find the Administrative Tools section as shown below.

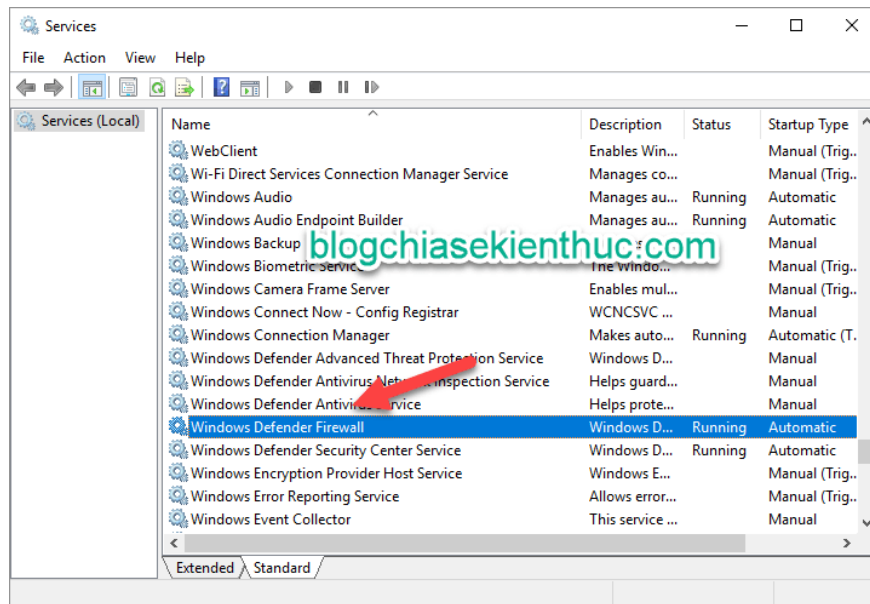

And double-click on Services to open the services management window.

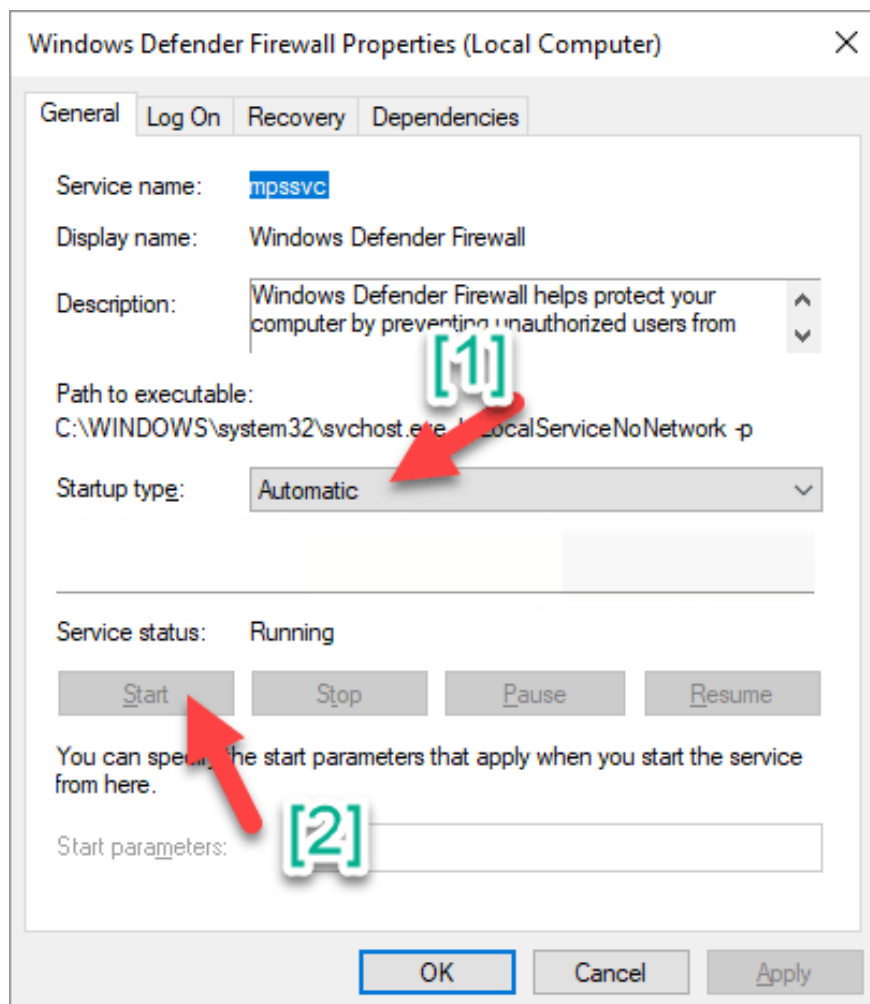

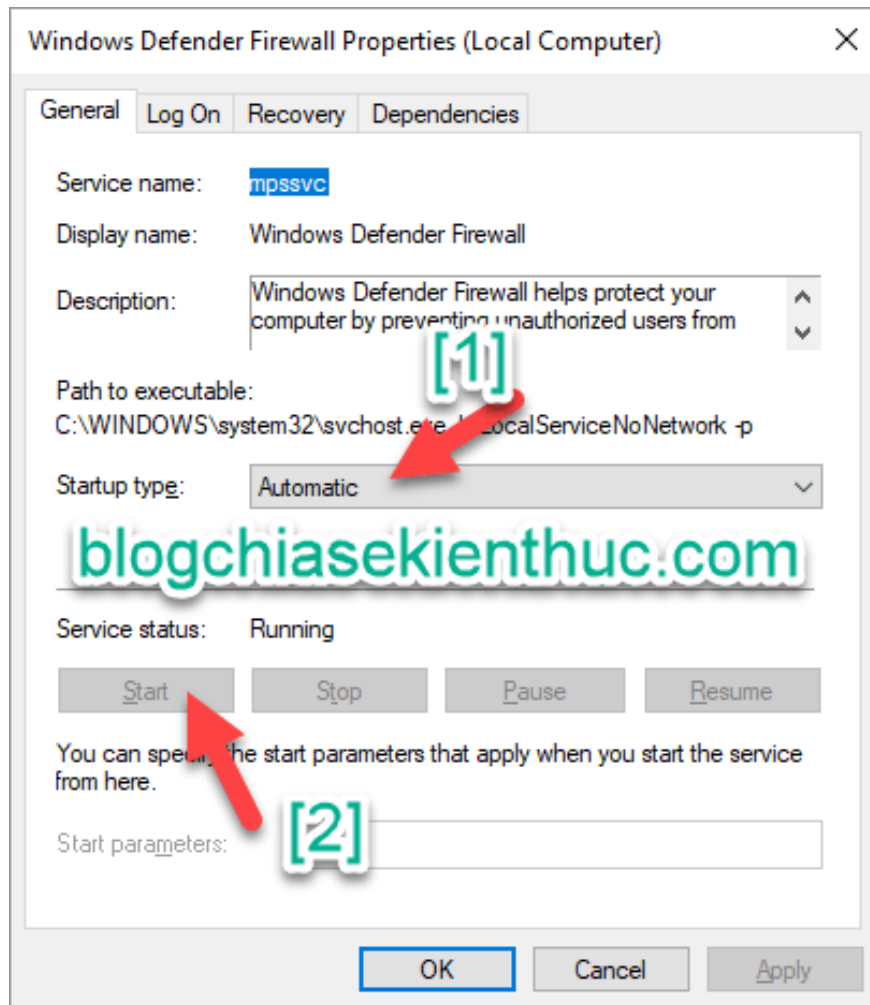

+ Step 2: You go to Windows Firewall service (on Windows 7 operating system), or Windows Defender Firewall (on Windows 10 operating system) => Double click to open.

+ Step 3: At the Startup type, you switch from Disable to Automatic => then click the Start button to launch the service.

+ Step 4: Done. Now you can share the printer so that other computers on the same LAN can connect and print.

If the error still occurs, try restarting your computer and share the printer again.

Epilogue

Yes, so I have finished instructing you how to Fix the error that cannot share the printer (with Error code 0x000006d9).

I have applied it successfully many times already, so you can rest assured that you will follow the instructions.

Hopefully this article will be useful for you. Good luck !
