

Fix the error that Safari automatically exits on iPhone / iPad

Some users of Safari on iOS devices suddenly encounter the problem of Safari automatically escaping. Once you enter any information in the address bar, Safari will immediately exit without any notification.

Some users of the default Safari browser on iOS devices suddenly encounter the problem of Safari automatically escaping. As soon as you log in to the address bar, Safari will immediately exit without any notification. Even if you reboot, clear your browsing history, . but the situation is still not satisfactory. Safari still automatically exits and returns to the main interface.

In this article, Network Administrator will show you how to temporarily fix the error of automatically leaving Safari while using it. Readers can refer and follow to fix this error.

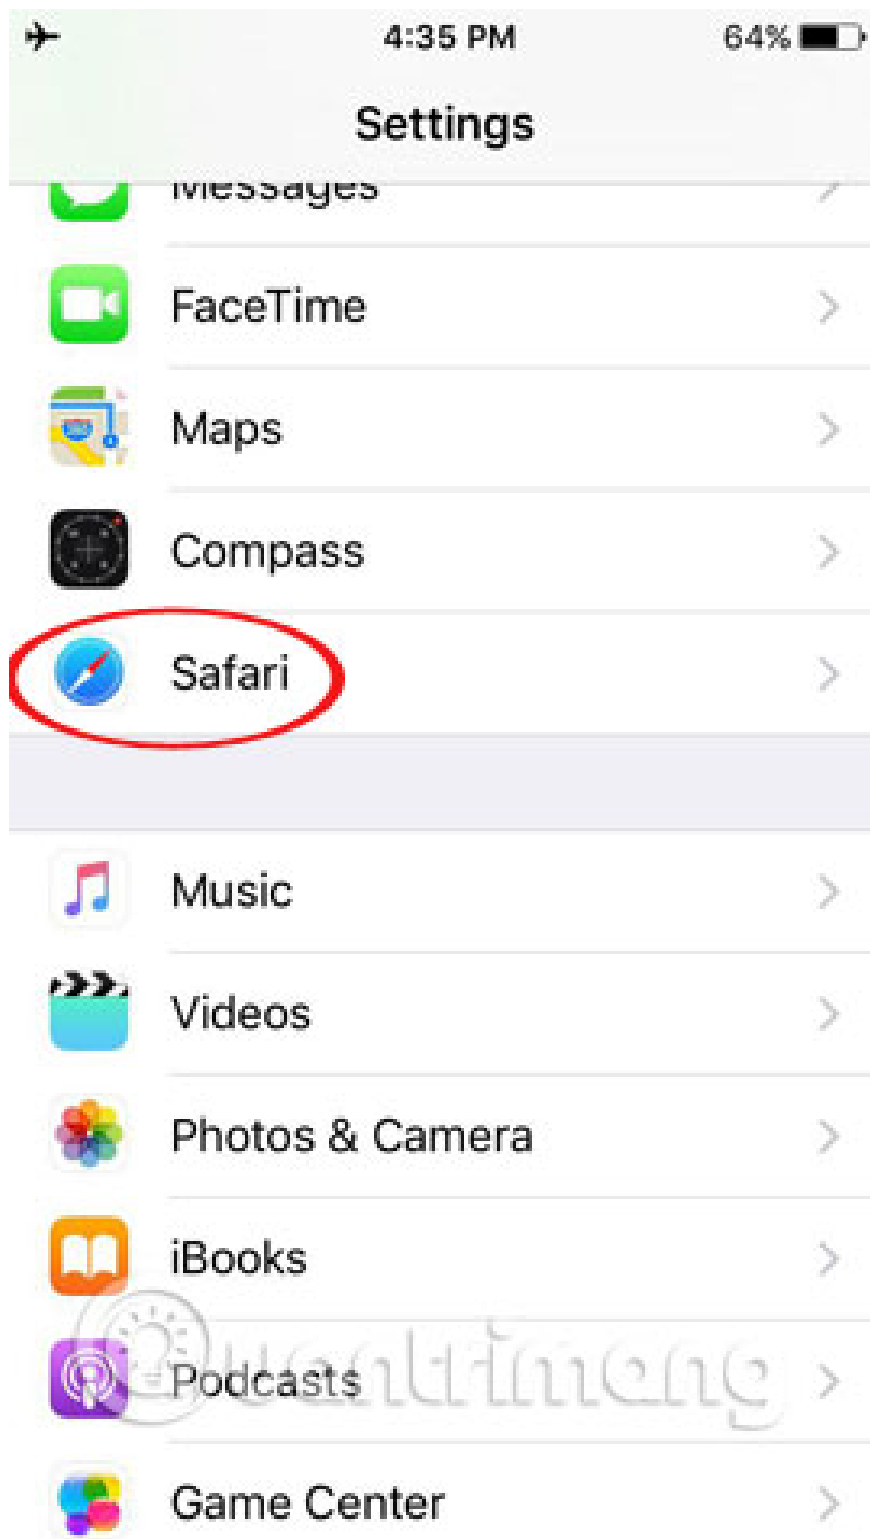

1. Download Safari browser for free
2. Download Safari browser for Mac

Fix Safari bug on iOS device

Step 1:

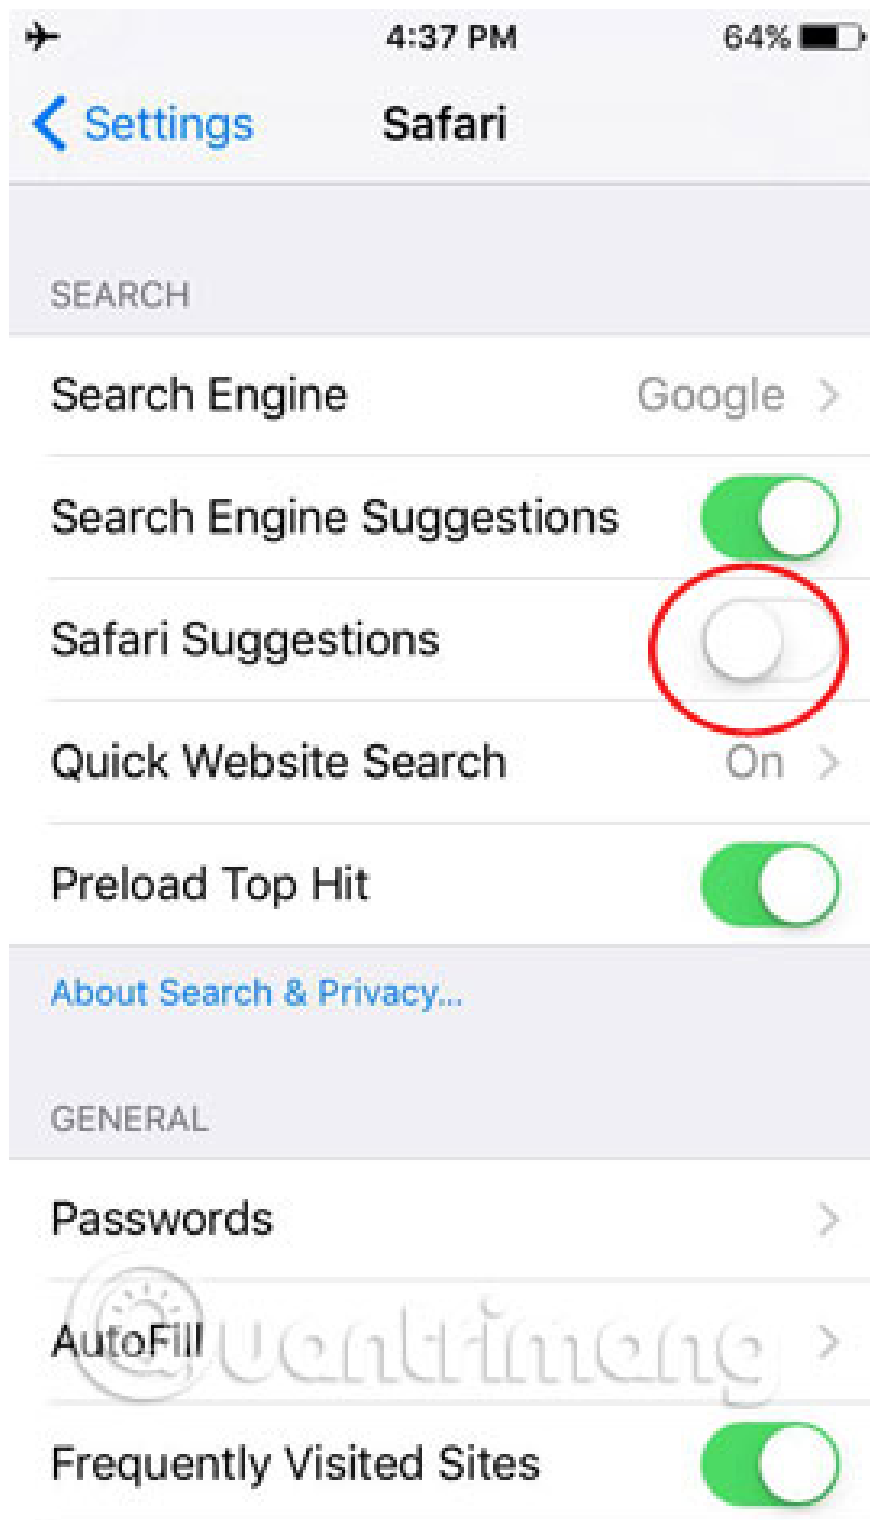

At the main screen interface, go to **Settings** and select **Safari** .

Step 2:

Turn off **Safari Suggestions** by moving the circle to the left.

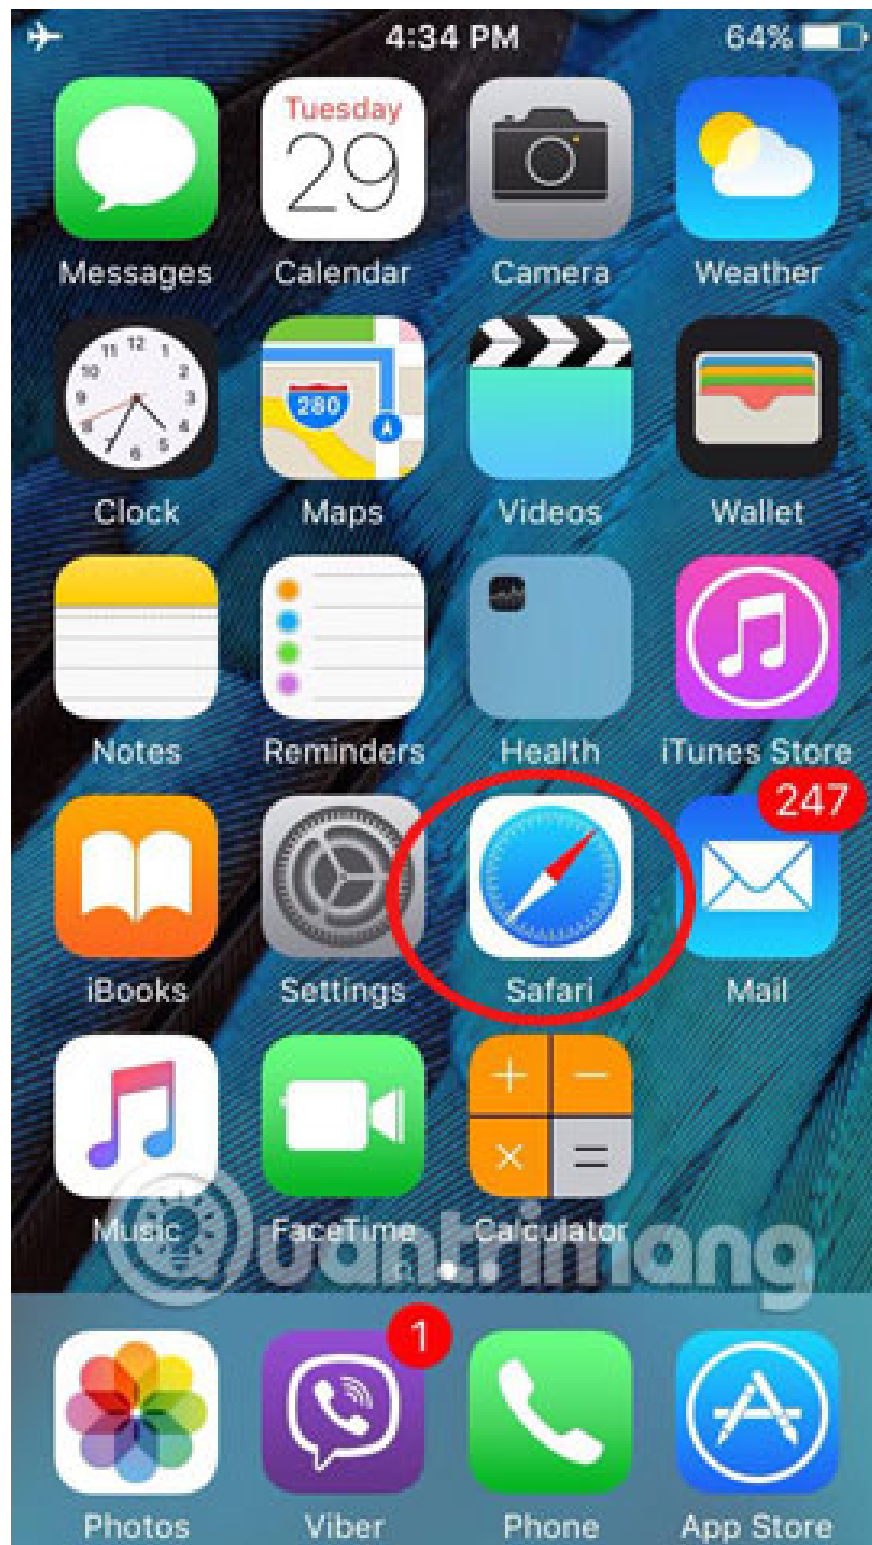

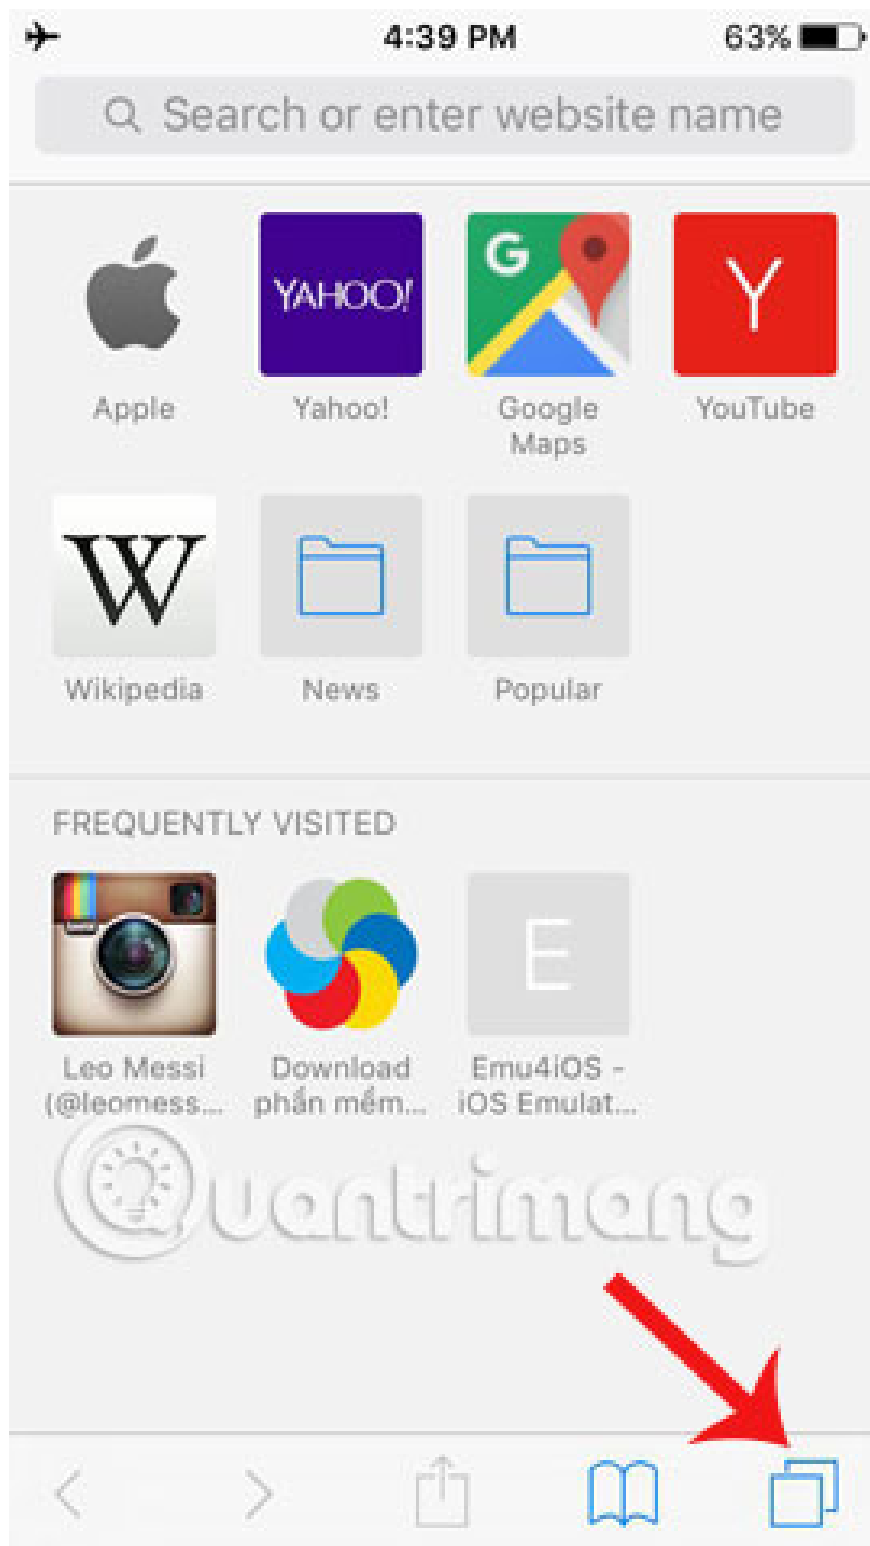

Or we can limit this error by accessing the browser in incognito mode.

How to access incognito mode on Safari

Step 1:

Go to **Safari** and click on **the icon that looks at the bottom right two squares** .

Step 2:

Safari interface changes. Users can see the visited pages. You need to delete them and click **Private** to enter incognito mode.

Step 3:

Select **Done** to use incognito mode as shown below. Incognito mode will have a darker background color than normal mode.
