

Fix the problem Unity can't play games on Chrome

The game is a pleasure, an indispensable means of entertainment for us, even for some people, it is a passion. But some current games force users to use software that supports Unity to play. The problem is, this tool is constantly being rejected by Google Chrome, making it impossible for users to want, or it's hard to play games comfortably.

The game is a pleasure, an indispensable means of entertainment for us, even for some people, it is a passion. But some current games force users to use software that supports Unity to play. The problem is, this tool is constantly "rejected" by Google Chrome, which makes it impossible for users, or it is difficult to play games comfortably.

Download Unity Web Player for free

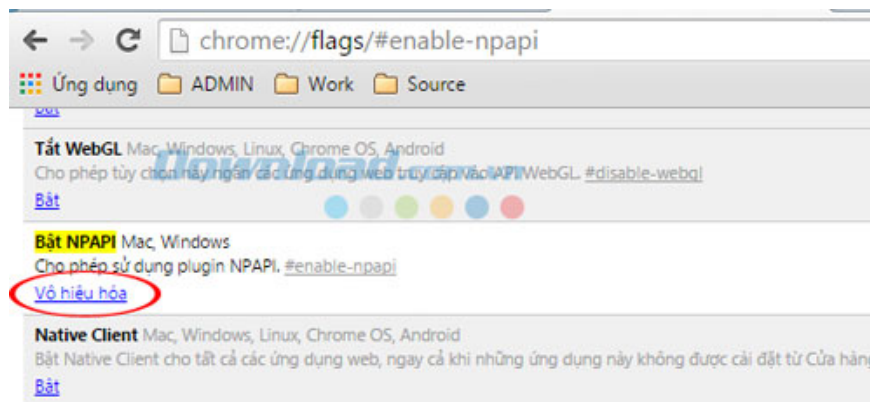

In this article, we will show you how to fix the Chrome bug that you have to reinstall Unity Web Player when playing the game. Although you already have Unity installed for your device, it is possible that Chrome will make some changes when you launch a new version of the upgrade, causing you to make this mistake.

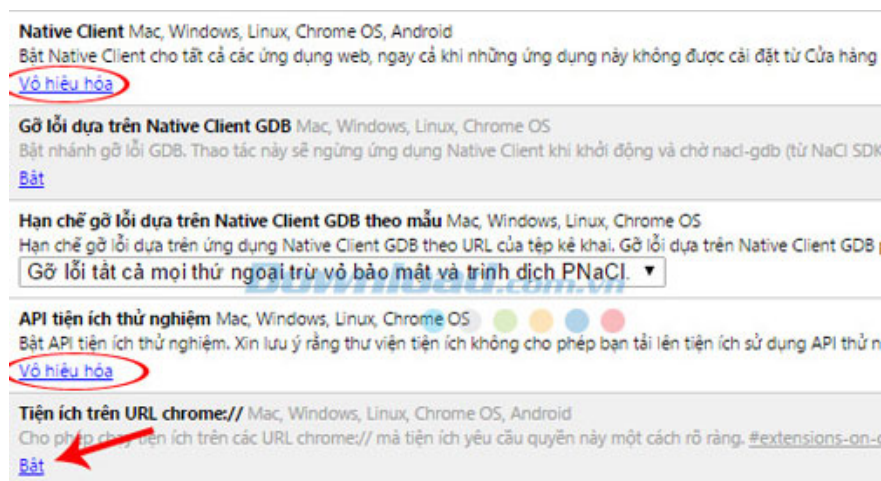

Step 1 : You start up Google Chrome browser, then enter the following address bar:

chrome:// flags / # enable-npapi

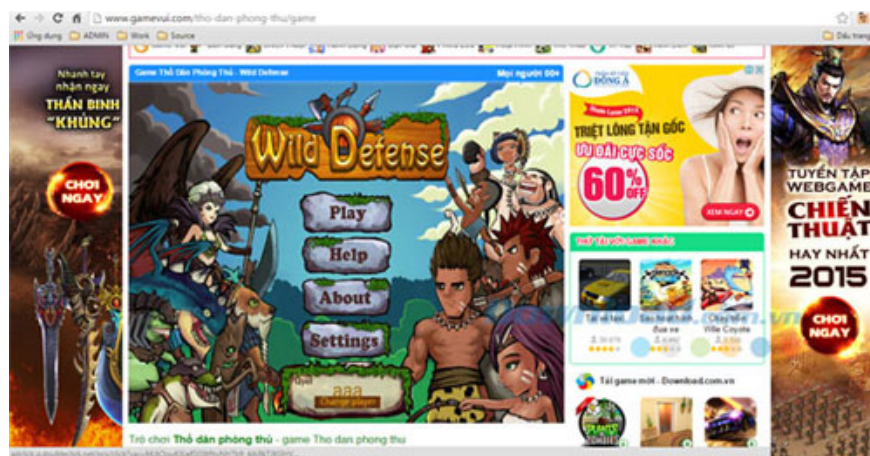

Step 2 : In the new page interface appears, you find the **Enable NPAPI Mac, Windows - Enable NPAPI Mac, Windows** . Then turn off this mode (*if enabled - Enable, switch to Disable - Disable*).

Step 3 : Then you go back to the browser, the game, reboot to check. If it still doesn't work, you can go back to the edit page just now, and Disable - Disable add items like: **Native Client, experimental utility API, Turn on SPDY / 4, Enable web platform feature experiment, or URL gadget on Chrome** .

Step 4 : Then reset the browser to enter the game normally.

In addition, you can also try to remove the Chrome version you are using and install an older version to fix this problem.

I wish you all success!
