

Fix 'These Items Are Too Big To Recycle' error on Windows 10

The troubleshooting guide cannot delete files with the message 'These Items Are Too Big To Recycle' on Windows 10.

When trying to delete a file by right-clicking and selecting **Delete** or using the **Delete** key on the keyboard, Windows 10 will put the file in the trash.

However, there are times when you want to delete a large file or folder, you will get a message " **Too big to recycle.**" **B?n có mu?n g? b? nó nào** 'with the answer **Yes** or **No**.

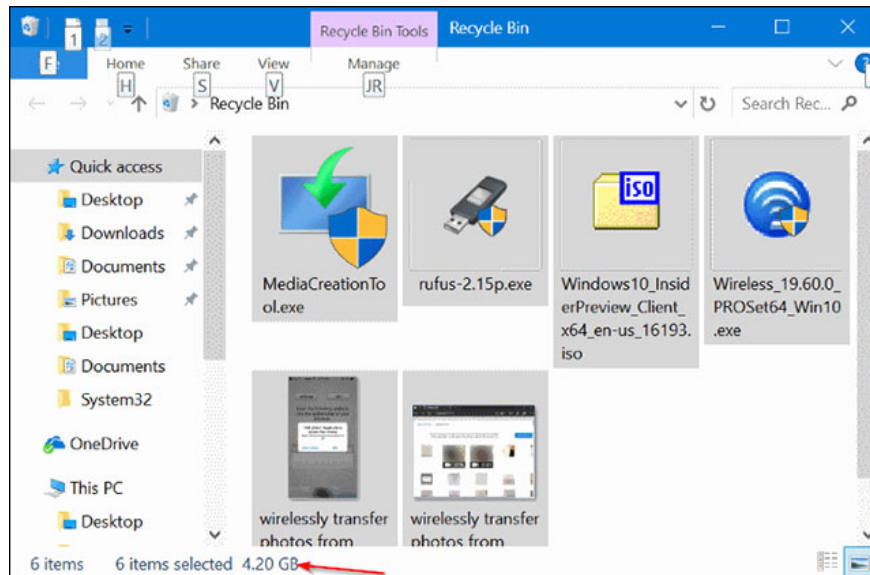

Notice that the file or folder is too large to delete

This message is displayed only when you try to trash a file or folder larger than the size that the trash can save, or there is not enough space in the trash.

If you get this error, use the 2 solutions below to fix it.

Method 1: Delete unnecessary files in the trash

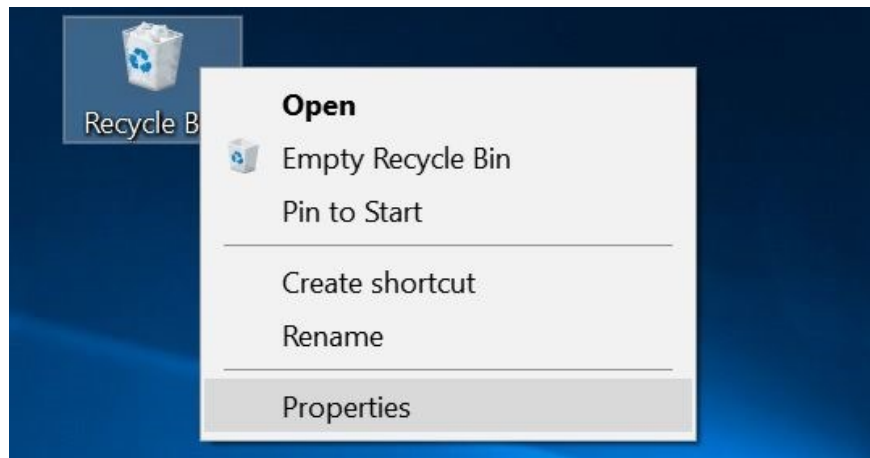

The cause is said that in the trash is not enough space and the file you want to delete is larger in size. The simple solution is to just open up the trash, delete the files that are no longer needed to free up memory. Remember that once deleted from the trash, it will be difficult to recover. So choose carefully.

Delete unnecessary files in the trash

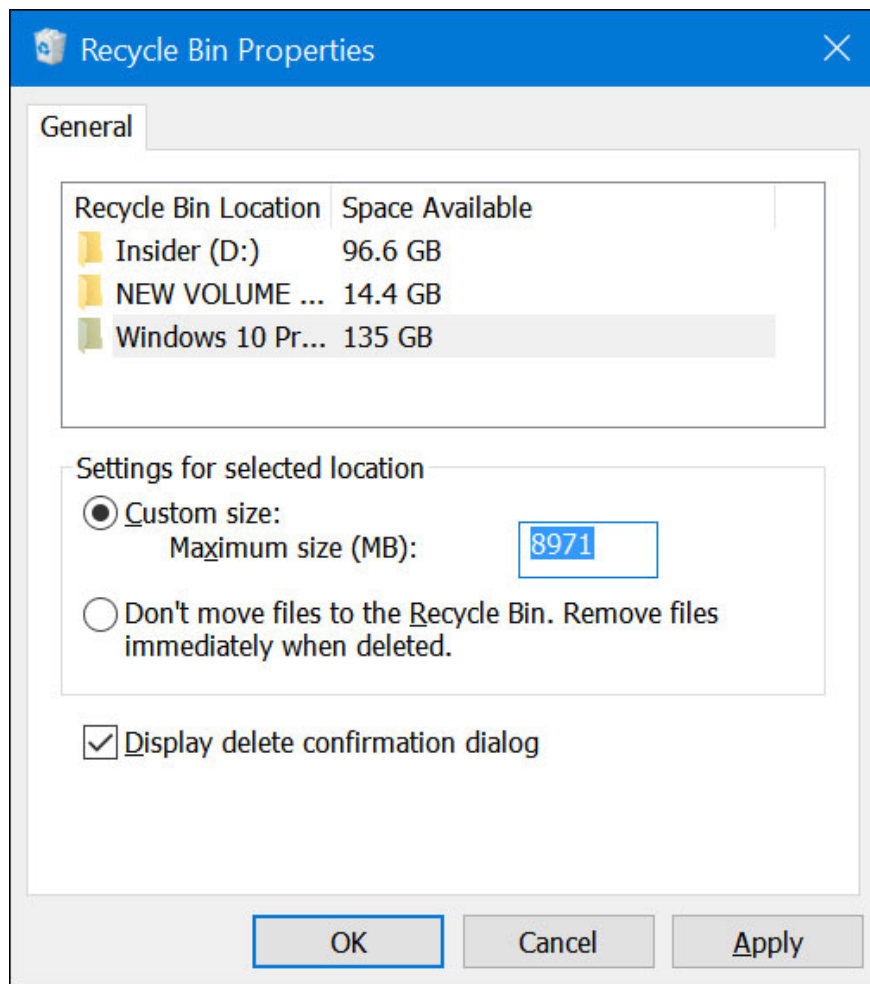

Method 2: Increase storage space for Recycle Bin trash

Step 1: Right-click the **Recycle Bin** icon on the desktop and select **Properties**.

Open the Trash Properties dialog box

Step 2. In the **Recycle Bin Properties** dialog box, select the drive containing the file you want to delete and receive the above error. In the **Settings for selected location** section, select a larger capacity.

Increase the capacity for trash at the required drive

Step 3: Click **Apply** to finish.
