

For the first time, Vietnam has a data center of international standard

Viettel IDC's data center has just become the first and only data center service provider in Vietnam to be granted the certificate of building and operating the most prestigious data center in the world (ANSI. / TIA-942-B: 2017 Rated-3 Constructed Facilities).

Viettel IDC's data center has just become the first and only data center service provider in Vietnam to be granted the certificate of building and operating the most prestigious data center in the world (ANSI. / TIA-942-B: 2017 Rated-3 Constructed Facilities).

If you do not know, this is a certificate of the construction and operation of the world's most prestigious data center under the standards set by the American Telecommunications Industry Association.

Viettel IDC's data center meets strict international standards.

To be granted this certificate, the system must meet the most stringent and comprehensive standard requirements in the world up to the present time on data center design, construction and operation; Ensuring the data center with all infrastructures is always at the highest level of redundancy, availability and security.

All components of Viettel IDC's data center have undergone a process of proper and reliable evaluation of operation related to telecommunications, electricity, architecture, electrical infrastructure, and planning. disaster recovery, security, environmental control . including more than 2,600 requests. This rigorous evaluation process

ensures Viettel IDC's data center is capable of protecting data for customers and minimizes the risk of business interruption in the event of a disaster.

Viettel IDC, with this certification, has officially become the first and only provider in Vietnam to deploy and operate data centers that meet ANSI / TIA-942 Rated 3. This achievement of Viettel IDC also brings Vietnam to appear in 5 out of 11 countries in Southeast Asia with world-class data centers.

1. Viettel is the first and only operator in Vietnam to support eSIM according to Apple standards
2. Apple Watch users in Vietnam can now use eSIM, cost VND 25,000 / month
3. Viettel, VinaPhone, VNPT, Mobifone, FPT . block websites containing videos and 18+ images on computers and phones?
