Currently in the market is prevailing a new type of photography, teenage style that young people often call "Korean-style photography". In fact, you can do such photos yourself on the computer with the help of Frame Show 1.2 software.

The program has a friendly interface, easy to use, including image and editing section. All the work you have to do is to choose a photo that is good to combine with the frames of the program. Click on Open image to select a personal photo (your portrait), go to the Open frame to select the program's frames. The program offers you many different topics such as Miscellaneous, Classical, Emotions, Seasons, Sports, Shapes, Occasions. In addition, you can download more frames at the program's website (Download more frames). Finally, to adjust the size of the image and frame, drag the two Resize image bars and Resize frames.

Once you are satisfied with the selected image, you can print it directly or save it. Make sure you have a photo of "Korean-style" photos at stores. The program has a capacity of 7 MB, compatible with all Windows, download a

15-day trial version at www.frameshow.com or purchase at computer stores.
