

Free, easy-to-use online video editing tool.

Online video editing is becoming a trend thanks to its convenience and the fact that it doesn't require software installation. From cutting and splicing to adding effects and quickly exporting videos, online video editing tools make it easy to create professional content right in your browser.

Want to edit videos online without downloading software? Here's a free tool to create videos quickly and easily right in your browser.

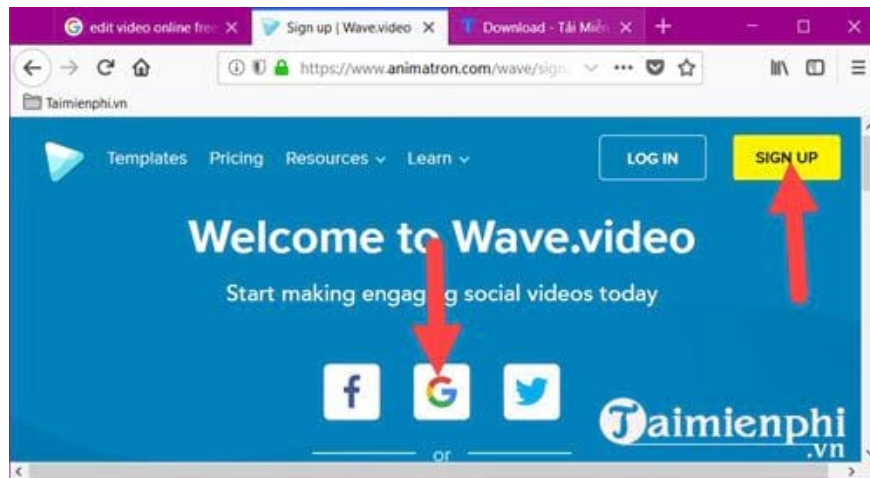

How to edit videos online for free

Step 1: Access the site [HERE](#) .

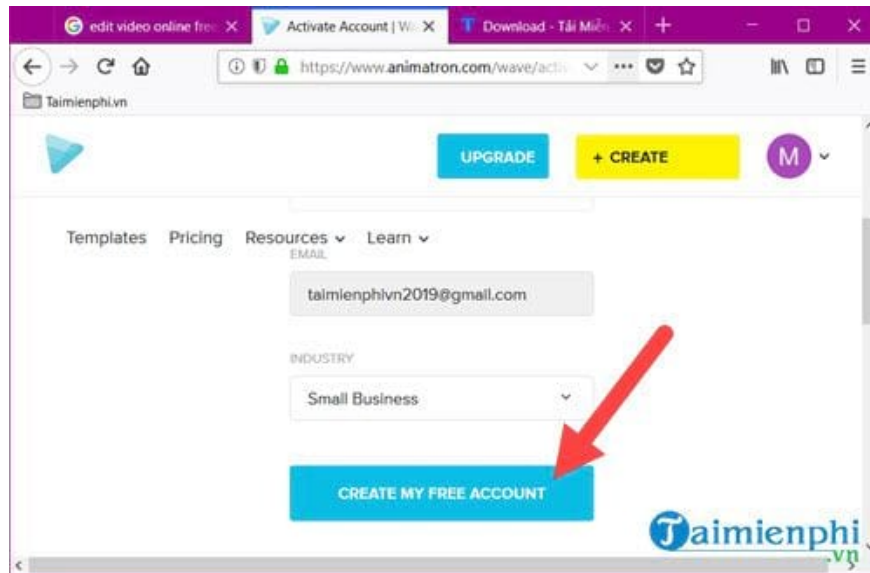

Step 2: After accessing Animatron, you need to log in to begin.

- If you don't have an account yet, click Sign Up to register.

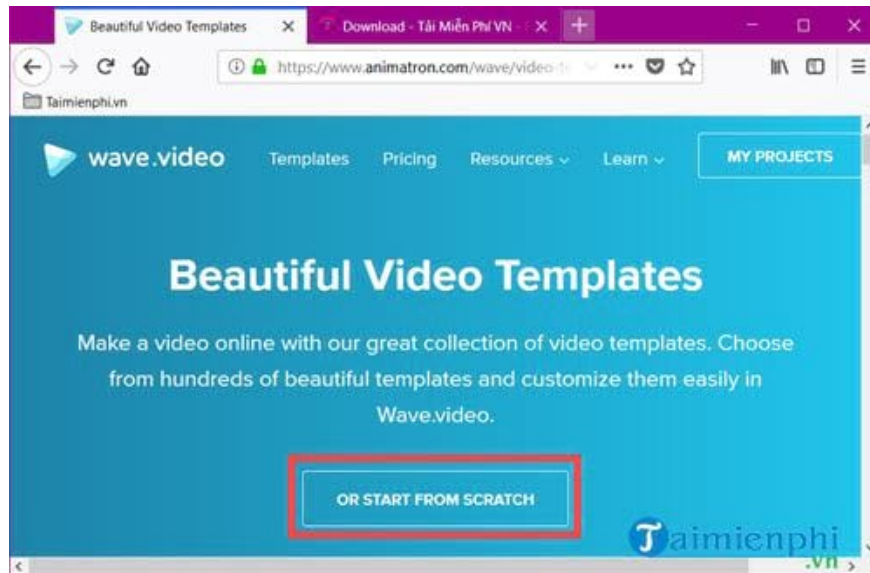

- You can choose to register quickly using Gmail to save time. This process is very fast, so you don't need to worry.

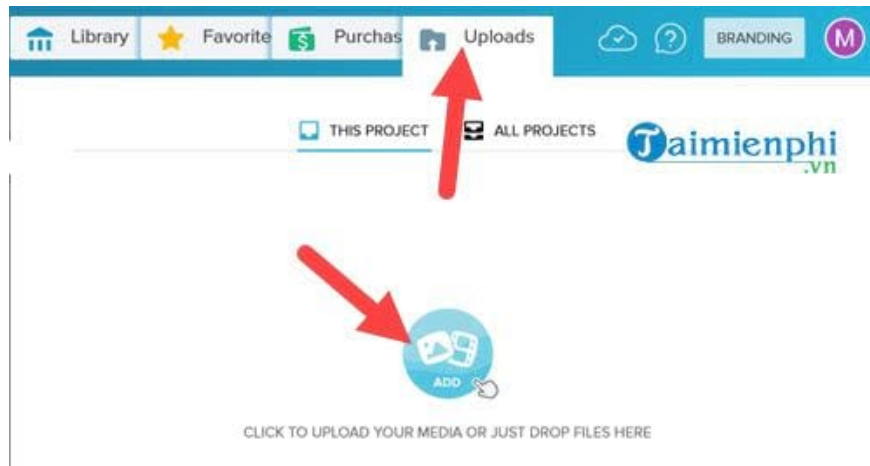

Step 3: Here, we just need to **confirm the email address** used and fill in the job title.

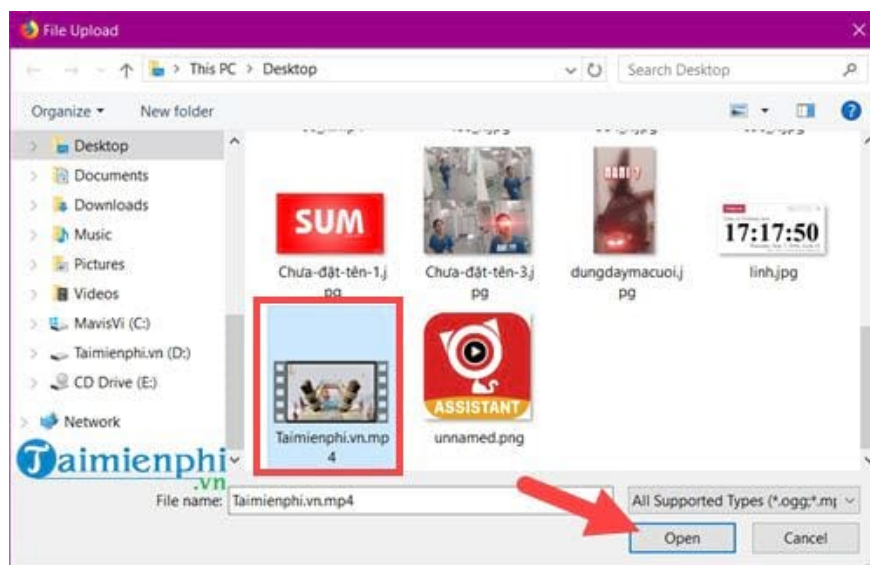

Step 4: Continue by clicking **Start from Scratch** .

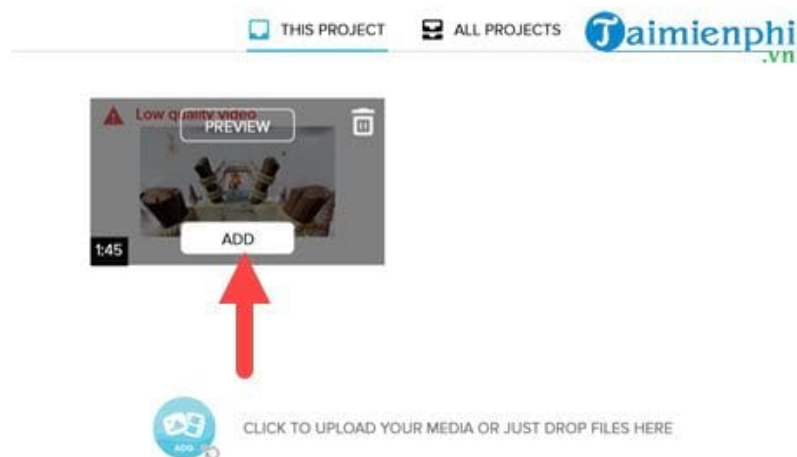

Step 5: Next, we proceed to upload the video you want to edit.

Select a video from your computer and then click **Open** .

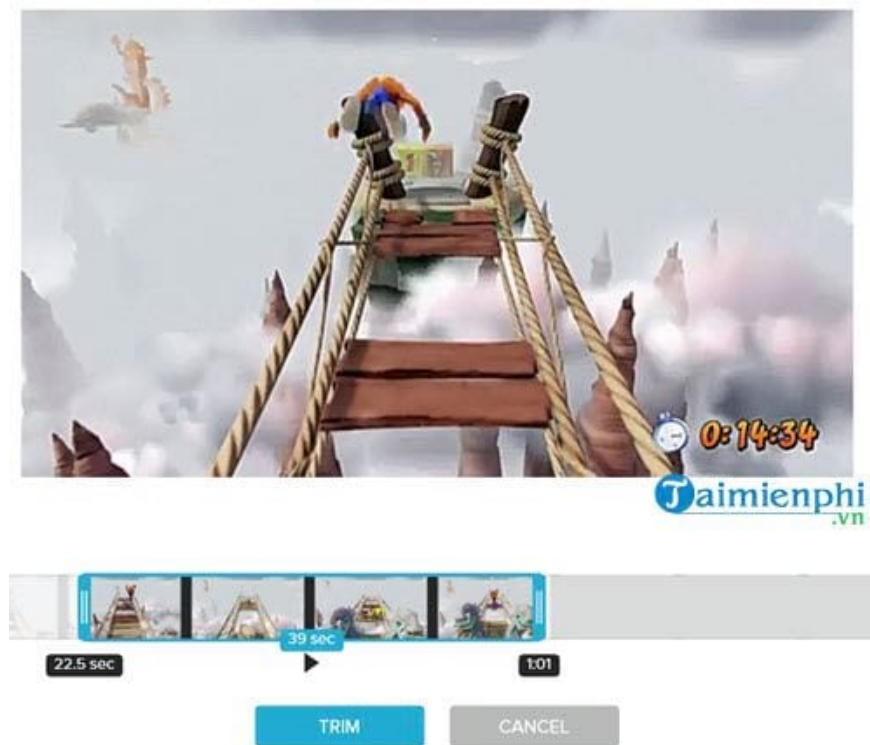

Step 6: After the video has finished uploading, click "Add" to begin editing.

Step 7: Select trims.

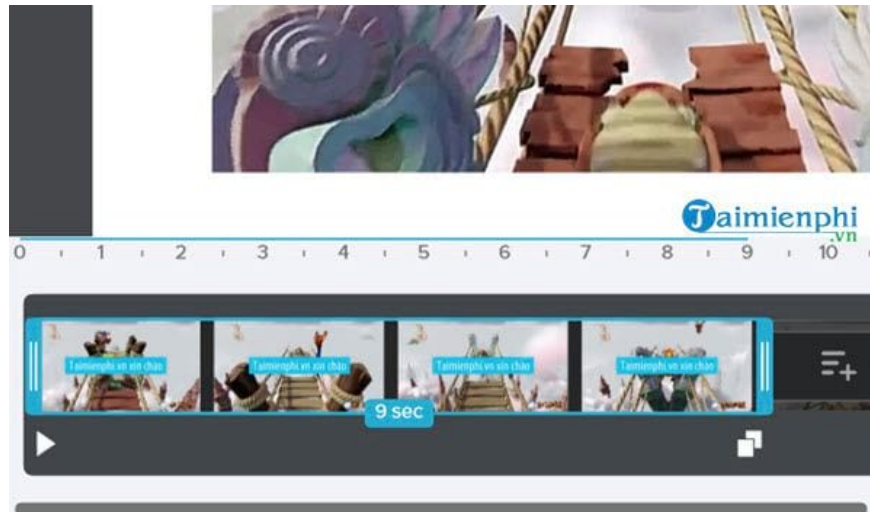

Step 8: Then select the video segment you want to keep; all other segments will be discarded.

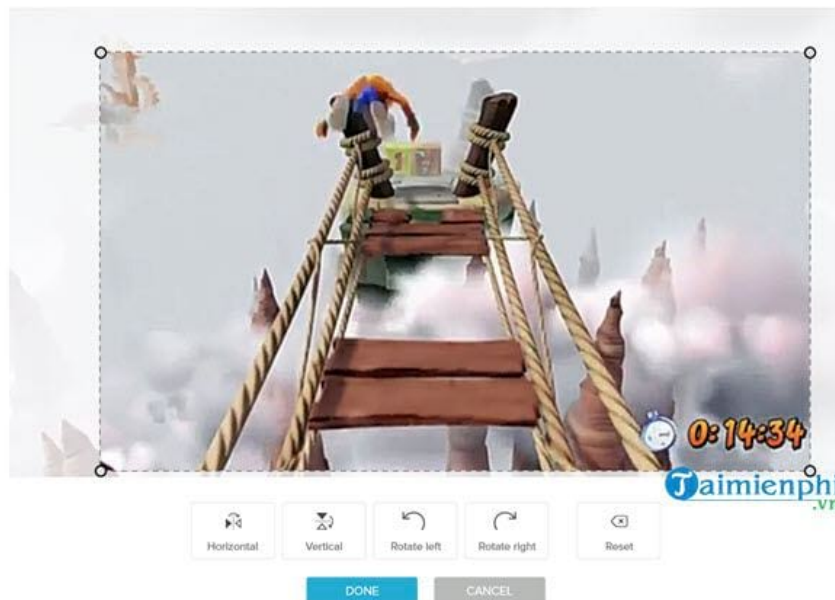

Step 9: With **Animatron** , users can **add text as they like** . To add text, click on the Text section, select a video effect, and then type in the desired text.

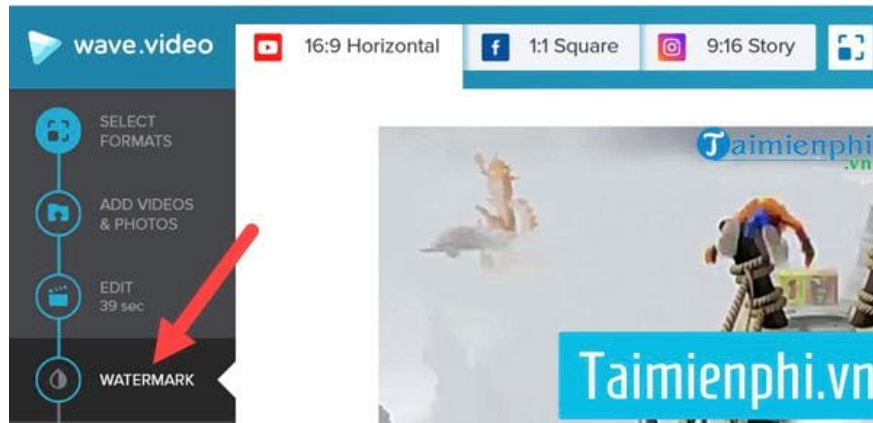

Step 10: Additionally, below allows users to customizedisplay **time of the text**.

Step 11: Another feature that users can customize is **changing the video frame** and aspect ratio to best suit the content they want to create.

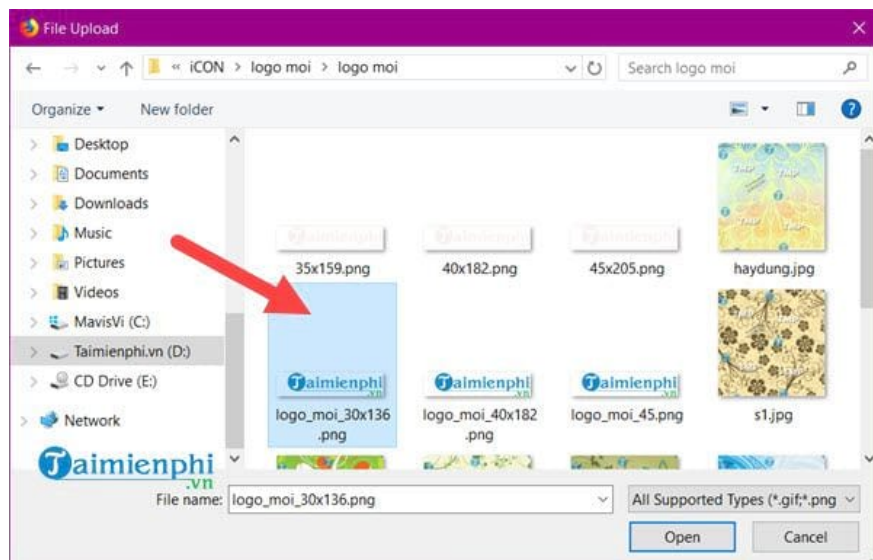

Step 12: Stamp with a **Watermark** .

Step 13: Click to retrieve the watermark from your computer and upload it to the system.

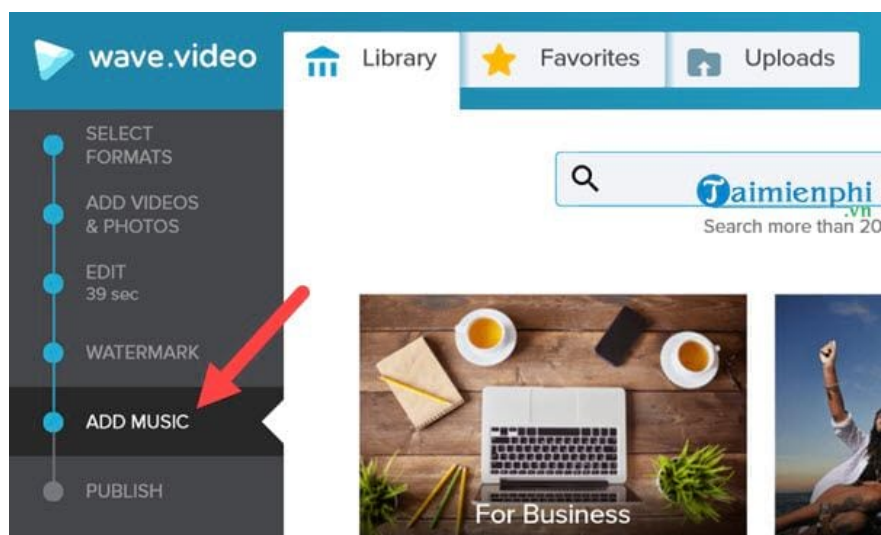

Choose a pre-existing logo from your computer to use as a watermark.

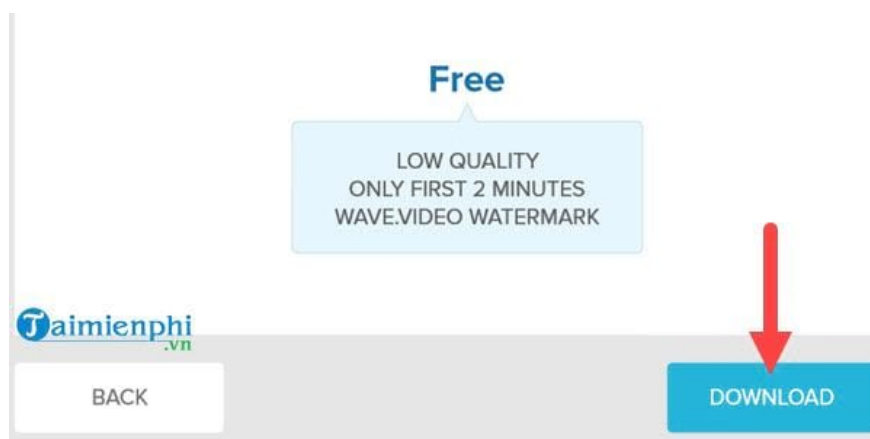

Step 14: Throw it into the video at any position you want.

Step 15: Next, add background music .

Step 16: Finally, we can **publish** the video, choose the resolution, and download it to our computer immediately after editing.

Animatron is one of the free online video editing tools that helps you quickly cut, splice, add effects, and export videos right in your browser. If you need a simple solution that still guarantees quality, this is definitely the right

choice.
