Free Fire OB32 will officially launch at the end of January with many changes, besides new game modes, this super hot survival shooter will update characters, weapons, maps, etc. Especially the Battle Royale game version for high configuration Free Fire Max OB32 will also have its own updates with completely new features. Below will be the details of the Free Fire OB32 update to invite you to follow.

Free Fire OB32 update details

Some information about Free Fire OB32

Free Fire OB32 release date

1. According to the Free Fire update schedule, the FF OB32 patch will be released on January 19, 2022 or January 20, 2022.
2. Clash Squad season 10 will close on January 20, 2022, so during that time players will not be able to access the game.

New Weapon in Free Fire OB32 Advance Server

Charge Buster

1. The Charge Buster is a shotgun with an infinite magazine with the ability to fire without wasting ammo.
2. To use this weapon, the player needs to hold the Fire button to reload over time. That action will increase range and damage for longer.
3. Which means the Charge Buster is the new weapon with the most firepower in Free Fire. Can instantly kill enemies with a single max charge.
4. This gun will be added to Clash Squad where close range weapons are just as powerful as mid range weapons.

M1887-X

1. M1887-X is an experimental version of the M1887 with 3 rounds in the slot instead of 2 as before. This will increase the danger of the gun by 2x as it removes the weapon's only weakness which is the low ammo count.
2. However, the M1887-X has slightly lower damage in the medium range, each bullet now deals 8 damage instead of the usual 9.

SVD-Y

1. SVD-Y is another variant of SVD with similar capabilities to the M82B that can shoot through glue walls. Since the SVD is already a powerful and popular FF gun, its SVD-Y variant can throw gameplay off balance.

M249-X

1. The M249-X is another variant of the M249 with an increased rate of fire. The M249 is one of the most uncommon weapons in the game, the biggest weakness of the M249 is its long reload time and it still hasn't been fixed.
