

From Elon Musk to Satya Nadella: This is a list of the top 29 CEOs of the technology world in 2018

It is impossible not to mention the talents of CEOs in technology circles. They are people who not only steer technology boats to new airspace, but also those who have a great influence to the speed of development of all humanity.

For the technology world in particular, 2018 is a scandalous year. Check out some of the highlights of the year, we will see this clearly. From the Facebook deal scandals with Cambridge Analytica, until Elon Musk smoked the marijuana while going live, or the vice president of Huawei has just been arrested in Canada and is at risk. Faced with imprisonment, the technology industry has made a significant contribution in a mess of worldly squabbles in 2018.

However, saying it must be said again. In the past year, the technology sector has also brought many valuable contributions to the overall development of the world. In it, it is impossible not to mention the talents of CEOs in the technology world. They are people who not only steer technology boats to new airspace, but also those who have a great influence to the speed of development of all humanity. Some people have been not only experts, observers, but also their employees to give praise for leadership as well as the strategic vision they have created for the company. And now, in the last days of the year, this is the right time to list the top CEOs of the 2018 technology world. Now, let's see who they are!
