

From now until before the Lunar New Year, the North will have cold and cold

According to hydro-meteorological experts, from now until before the Lunar New Year, the Southern region is quite dry, cool weather and the North will be cold, the Central has a long rain. This winter, the weather will be colder than last year.

According to hydro-meteorological experts, from now until before the Lunar New Year, the Southern region is quite dry, cool weather and the North will be cold, the Central has a long rain. This winter, the weather will be colder than last year.

1. This is the only part of the body that is not cold or freezing no matter how cold the weather is
2. 9 habits should be removed immediately if you do not want to be sick when it is cold

Mr. Hoang Phuc Lam, Head of the Long-Term Meteorological Forecasting Division, the Central Hydrometeorological Center, said La Nina's phenomenon has started to work again, causing sea surface temperature in the area The Eastern Pacific is lower than the average temperature of 0.8 degrees Celsius. This will affect our country's weather. The weather will be complicated and rainfall will increase higher than the average of many years.

The North will welcome cold and cold waves in the South and cool weather before the Lunar New Year.(Photo: Internet.)

Last winter, the temperature was quite high, so even though this winter is colder, there is not much change.

Mr. Lam also made comments on the weather situation during the Lunar New Year in 2018 in our country. From now until the end of December, North and North Central appear cold, damaging on a large scale with rain. The South enjoyed quite nice weather, almost no rain. Trung will suffer from heavy rains lasting 5-7 days, then pause and then have the next rain.
