**According to ASUS, from today, the company officially sells the EeePC product line - a versatile laptop with a size smaller than A4 paper with a weight of 0.92kg to Vietnam market.**

EeePC is compact, slim, stylish and equipped with the most advanced technology with ASUS Linux operating system. The EeePC has an SSD hard drive which is the latest, durable, shockproof design and 127 times faster than traditional HDD which saves more than 50% of energy. Inside the EeePC is the world-famous ASUS motherboard. The EeePC chipset is developed by the world's leading chip manufacturer, Intel. Genuine EeePC products from ASUS are officially sold in Vietnam in 4 colors: black, white, blue, pink, sold simultaneously in 6 authorized distribution points nationwide for \$ 399 (price For EeePC with 4G SSD - VAT included).

EeePC stands for Easy to Learn, Easy to Work, Easy to Play (easy to learn, easy to work, easy to play). EeePC meets most needs: compact to move, wifi connection, surf the web, play games, listen to music . The device is equipped with 7-inch screen, with 3 USB ports to connect with devices Peripherals, LAN ports and modems support internet connection next to the Wifi connection of the device. In addition, the machine also has an MMC.SD memory card reader slot, which allows users to add additional cards to increase storage capacity. Above the screen is a small built-in webcam. In addition, this EeePc is also equipped with 2 external speakers with HD sound quality for excellent sound, for mobile entertainment wherever you are.

It takes only about 15 seconds to boot up, and EeePC supports users of office applications that are fully compatible with commonly used applications on Windows. The Open Office software suite with text, spreadsheet, and presentation software can open and store files compatible with Word, Excel and Powerpoint files. The PDF Reader tool allows reading popular PDF files and Thunderbird mailing software to create a comprehensive set of applications for all office tasks. In addition, in the study section, EeePC is preloaded with many interesting applications for scientific research, foreign language learning and mathematics. The Asus Linux operating system is optimized to meet all basic needs such as work, study, and entertainment. However, users can also install Windows XP or even Windows Vista.
