The Fujitsu LifeBook S6510 has a gray smoky shell, the chassis is made of sturdy magnesium alloy but its weight remains light (1.6 kg). High-grade alloy material ensures that the machine can withstand strong impact, even "owl" falls from a height of 1 meter.

The screen of the device retains a 14.1-inch resolution with SuperFine technology and the Back-Light LED ensures that it can be viewed from any angle. Notably, the screen border is only 5.6 mm thin, so this machine is dubbed the computer with the thinnest screen border.

The S6510 is equipped with the Penryn Intel Core 2 Duo T8300 processor (2 * 2.4 GHz, 3 MB L2 cache), FSB reaching 800 MHz, powerful 2 GB RAM and maximum energy savings. Hot Swappable has a quick-release compartment so users can disassemble the DVD \pm RW head to install a second 6-cell battery. However, if using only a 6-cell battery of the machine, it is also used continuously for 5 hours.

S6510 has been present at computer stores nationwide. *Photo: Engadget*

S6510 also 'scores' with a series of advanced security devices such as Bios Password, HDD Password, Finger Print fingerprint recognition and the most modern with TPM Security Chip. This laptop uses Wi-Fi 802.11 a / b / g / n technology, along with two Mic and 1.3 Megapixel resolution webcam.

This product is available at computer stores nationwide, costing about VND 32 million. In August, when you buy any Fujitsu laptop, you will be given a 4 GB USB flash drive.

Japanese electronics firm Fujitsu surpassed fourth place in the IT industry with a profit of \$ 875 million. (Fortune 500 poll).
