Reasons why you can't redeem Arise Crossover code

1. **Giftcode has expired:** This is probably the most common reason, some codes are no longer valid after a while, leading to a message that the code cannot be redeemed.
2. **Enter the wrong character in the giftcode:** The code is case sensitive, if you enter a wrong character, the system will not allow you to redeem. It is best to copy and paste the code in the code table above into the code content box in the game and select redeem.
3. **Used code:** Each giftcode can only be redeemed once per account. If you have entered it before, you will receive a notification that the code has been redeemed.
4. **Giftcodes are limited to certain users:** Some codes are only available to players who have reached a certain level. If you have not reached or surpassed that level, you will not be able to redeem the code for rewards.
5. **Game system error:** After the game is updated, the server may be temporarily interrupted, causing the giftcode to not work. In that case, you should exit the game or wait until the game publisher fixes the error and changes the code.
