Why can't I redeem the giftcode?

Code not running? Don't worry, here are some common reasons and how to fix them:

1. **Incorrect Uppercase/Lowercase** : Some codes are case sensitive, maybe Huyen Anh Vo Lam's code does not check. You can try lowercase characters when changing the code.
2. **Excess Spaces** : Make sure there are no extra spaces at the beginning or end of the code.
3. **Expired Code** : The code may have 'expired' or no more uses.
4. **One Time Only** : Each account can only use the code once, it cannot be 'reused'.
5. **Duplicate Code Type** : Some codes of the same type can only be used once, even though there are many different codes.

If you have checked based on the suggestions above and still not working, then your code may be expired.
