

# Functional graphing application

Some graphing calculators are very expensive, so handy functional graphing software for your iPhone or iPad is more valuable than ever.

If you had to study any kind of applied math in high school or college, you really would need a graphing calculator. However, some computers of this type are very expensive, so the handy function graphing software for iPhone or iPad becomes more valuable than ever.

Here are the best function graphing applications that **TipsMake.com** would recommend to readers!

## Free Graphing Calculator

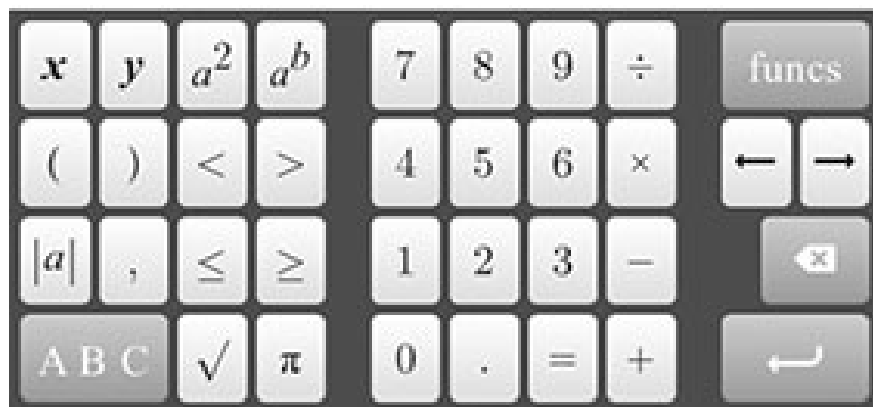

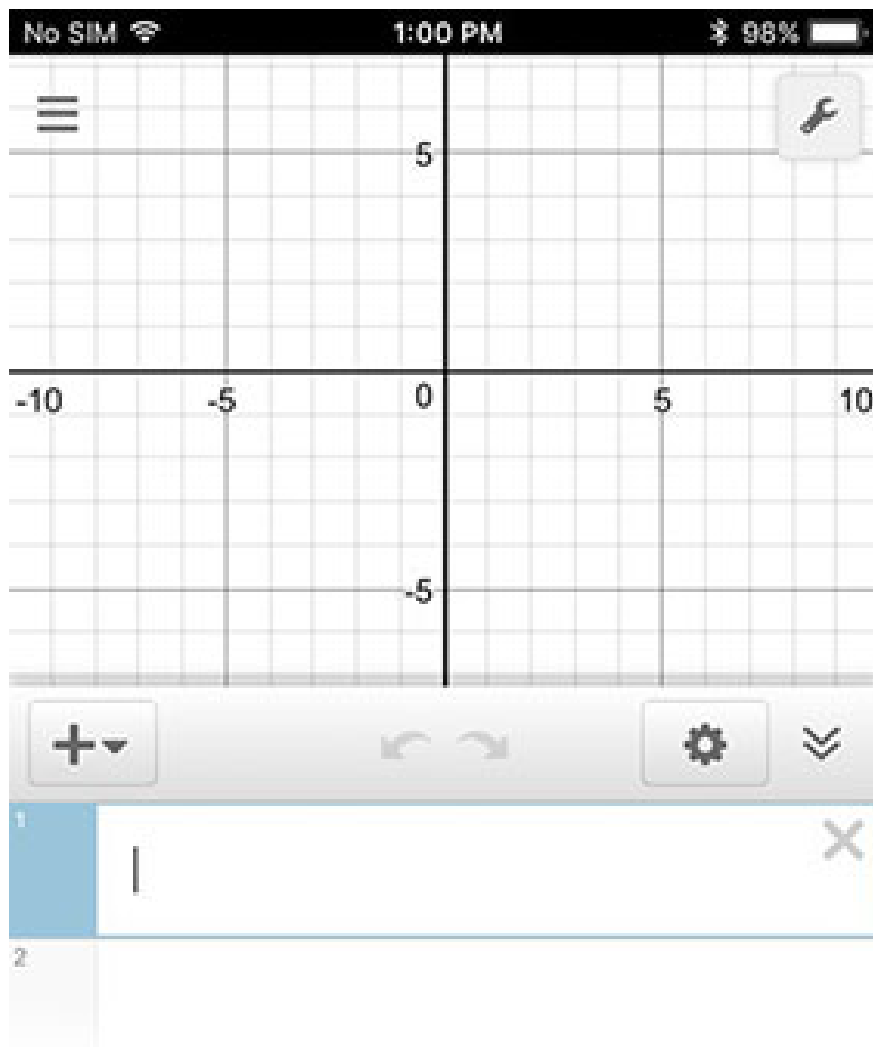

This functional graphing app has more than 4 million downloads and maintains a 4.5-star rating with nearly 3,000 reviews.

This is a powerful application that allows you to perform all types of calculations and can chart up to 4 equations at once, meaning you can finish your homework in just blink! You can graph graphs with polar coordinates, graph parametric equations, hidden functions, and more.

If you're looking for a completely free solution to meet your graphing calculator needs, this is definitely the right app. (You can remove ads for \$ 0.99 - 23,000 VND, if desired).

## **Desmos Graphing Calculator**

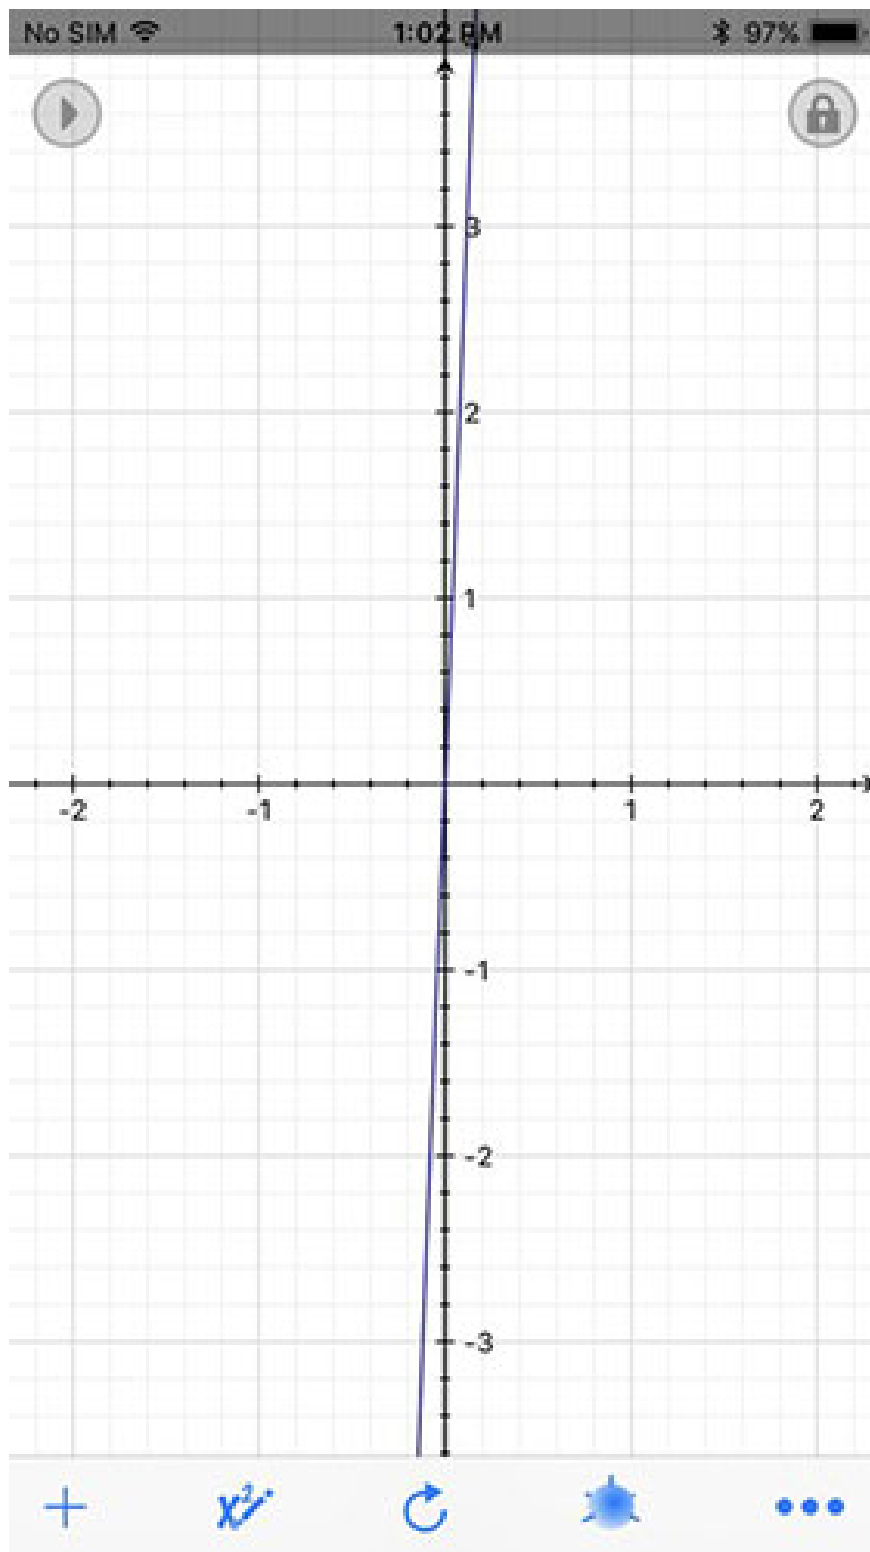

Desmos Graphing Calculator is another free application with a full set of graphing options. You can graph with polar, Cartesian and parametric coordinates, without limits on the number of expressions you can plot at the same time.

Convenient sliders allow you to adjust values quickly, so you can see how parameters affect the chart.

If you're looking for an intuitive function graphing application, Desmos will fulfill your needs.

## **Quick Graph**

Quick Graph is an application dedicated to graphing. You can draw 6 identical equations in both 2D and 3D modes (if you spend \$ 2 - 46,000 VND to get the advanced feature set, that limit will no longer exist).

You can visualize your equations using lines or shapes and control images by zooming or dragging and rotating. You can then save your charts to your photo library and share them as you like. Quick Graph has a 4 star rating in the App Store, with over 10,700 reviews, so this option is definitely worth downloading.

## **Calculator +**

Calculator + of xNeat.com is a free application and even without ads. However, you must pay \$ 9.99 (230,000 VND) to fully unlock the application or pay \$ 3.99 (92,000 VND) to unlock only function graphing. Calculator + can also be used on an Apple Watch, so you can make calculations right on your wrist.

This is one of the function graphing applications that has the best appearance. You can go back and edit all your calculations in real time to always get the results you want without having to retype everything.

If you are looking for a functional graphing option, this is a great application, but the cost will be quite large if you need more features.
