

Galaxy A01: Dual camera, Android 10, priced at 2.8 million

Samsung has launched the Galaxy A01 model, its cheap smartphone for 2.8 million.

Samsung has launched the Galaxy A01, its low-cost smartphone at VND2.8 million, has a compact design, dual cameras and meets the daily needs.

The device is equipped with a screen size of 5.7 inches, HD +, the ratio of 19: 9, V-shaped top notch on the front. The bottom of the device is quite thick compared to other smartphones in the price range.

The back of the device is made of plastic material so it is less prone to sweat, fingerprints.

The dual rear camera cluster of the device includes a 13 MP main camera, F / 2.2 aperture and 2 MP camera, which supports depth of field measurement.

Practical experience Galaxy A01 shows that the machine has a fast shutter speed but appears a slight lag when switching between modes. Users can customize the level of background removal when in autofocus mode but cannot edit after shooting. Photos after shooting for lighter colors than reality when shooting in normal mode. With the font removal mode, photos appear to be quite natural, detailed and the subject is highlighted.

Galaxy A01 is equipped with Snapdragon 439 chip, 2GB RAM, 16GB ROM and 3,000 mAh battery, charging via MicroUSB port.

Galaxy A01 comes pre-installed with Android 10 operating system, customized according to the One UI 2. interface. The device is sold for 2.8 million VND, belonging to the cheap segment, easy to access users.
