

# Galaxy M11 revealed: Perforated screen, 3 rear cameras, Snapdragon 450, 5000mAh battery

The design, specifications of Samsung Galaxy M11 have just been revealed through the latest leak.

Samsung recently introduced the Galaxy M31 and Galaxy M21 duo in India. According to the report, the company may soon launch the Galaxy M11 - its next low-cost smartphone, as the phone has just been found in the database of the NCC certification agency (Taiwan), Wi-Fi Alliance and Google Play Console.

Although the launch date of the Galaxy M11 is still a mystery, recently, images of press renderings and device specifications have been leaked online, giving us a look. more clearly about the design of the machine before being officially announced.

## Design

A series of leaked renders show that the Galaxy M11 will have three color options: Black, Purple and Blue. The back of the device seems to be made of plastic, has a fingerprint sensor and a 3-camera system arranged vertically. Meanwhile, the front is a perforated screen with a "mole" in the upper left corner to accommodate the selfie camera.

### **Technical data**

According to the latest leak, Galaxy M11 will be equipped with a 6.4-inch LCD screen with HD + resolution (720 x 1560 pixels). The phone uses Snapdragon 450 processor, combined with 3GB / 4GB RAM and 32GB / 64GB internal memory, supports expansion with a microSD card.

The Galaxy M11's triple rear camera system includes a 13MP main sensor with  $f / 1.8$  aperture, a 5MP ultra-wide angle sensor with  $f / 2.2$  aperture, and a 2MP depth sensor with  $f / 2.4$  aperture. Meanwhile, the selfie camera placed in the "mole" on the front of the machine has 8MP resolution,  $f / 2.0$  aperture.

Galaxy M11 comes with a 5000mAh battery, supports 15W fast charging through USB-C port. The device comes pre-installed with Android 10 operating system with One UI 2.0 interface when sold, supports face unlock and has a 3.5mm headphone jack.
