

Galaxy M30s launched in Vietnam, 6000mAh battery, priced at 6.99 million

Today (November 1), Samsung officially launched Galaxy M30s in Vietnam market. This is an upgraded product of the Galaxy M30 with improved performance, battery life and camera.

Today (November 1), Samsung officially launched Galaxy M30s in Vietnam market. This is an upgraded product of the Galaxy M30 with improved performance, battery life and camera.

In terms of design, the Galaxy M30s has a 6.4-inch Super AMOLED screen, a Full HD + resolution of 19.5: 9, with a 'water drop'.

The rear camera cluster on the back of the M30s is wider. The LED flash is located right next to the camera assembly instead of below like on the previous M30.

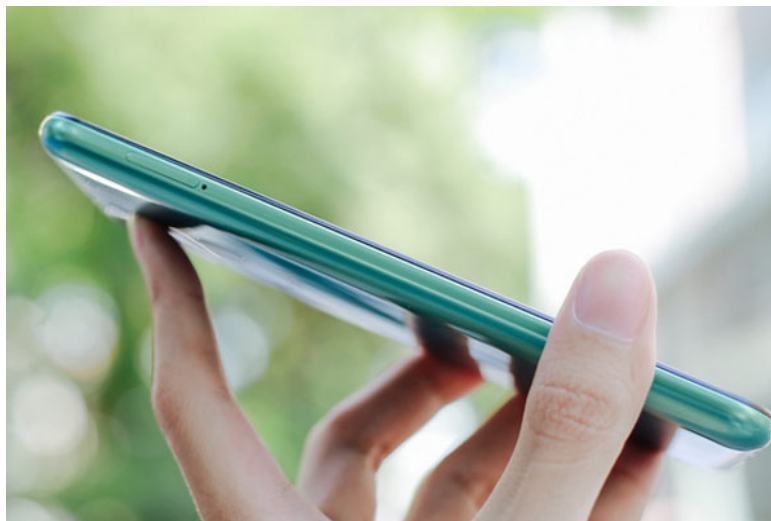

Galaxy M30s is equipped with a rear camera cluster including a 48MP f / 2.0 main sensor, an 8MP f / 2.2 super wide-angle camera, a 5MP depth-measuring camera. Samsung has integrated the M30s camera application with many different shooting and movie modes such as Super Slowmotion, Super Steady, Portrait mode with Art Bokeh . The selfie camera has a resolution of 16MP f / 2.0.

Regarding hardware, Galaxy M30s is equipped with Exynos 9611 chip, 4GB RAM, 64GB internal memory, with memory card support. The most special feature of the M30s is the "super" 6000mAh battery capacity with 15W fast charging. Galaxy M30s pre-installed Android 9.0 Pie with One UI interface.

Galaxy M30s has 3 colors: Mysterious Black, Blue Turquoise, White Tinh Van with the price of 6.99 million VND.

Here are some photos on Galaxy M30s hands, invite you to admire.

1. Motorola RAZR, flexible screen smartphone for the first time shows very impressive real photos

2. Galaxy Xcover FieldPro: Super durable smartphone for US agents only
3. Xiaomi launches Mi 9 Pro 5G: Snapdragon 855+ chip, the world's fastest 30W wireless charger, 5G connectivity
