

Galaxy Note 9 special edition, inlaid 1KG of pure gold, priced at 1.4 billion

Today, a luxury smartphone company from Russia called Caviar has released a special version of the Galaxy Note 9 with 1KG of pure gold on the back.

Today, a luxury smartphone company from Russia called Caviar has released a special version of the Galaxy Note 9 with 1KG of pure gold on the back.

Because it is covered by 1Kg of gold, the size of this special Galaxy Note 9 is quite thick and the dorsal part is much higher than the details such as camera cluster or fingerprint sensor.

The Galaxy Note 9 Fine Gold Edition is expected to be sold for about \$ 60,000 (equivalent to VND 1.4 billion).

In addition to the gold-plated version, the company also released other special Galaxy Note 9 versions such as crocodile skin or gold etched and sold for about 3000 Euro (about VND 80 million).
