

Galaxy S11 5G officially appeared on Geekbench with impressive specifications

The Galaxy S11 will be officially launched by Samsung in late February 2020.

According to the plan, the Galaxy S11 will be officially launched by Samsung in late February, and will also be the most sought-after flagship model in the first half of 2020. Yesterday, this phone has officially appeared on Geekbench with very noticeable specifications.

Specifically, the Galaxy S11 listed on Geekbench has the identifier SM-G986B, with some prominent configuration details such as the flagship Exynos 990 chip, integrated 5G, and 12GB Ram. In terms of internal memory, the Galaxy S11 will be available with 2 storage options: 128GB and 512GB, while the 5G variant will be sold with 3 storage options and include 128GB, 256GB and 512GB.

The above specifications are very good, but to comment that the Galaxy S11 is strong or weak, we have to give specific numbers, typically Geekbench score 5. Geekbench 5 scores show that S11 will be an extremely powerful device, with a single-core score of 427 and a multi-core score of 2326. However, it should be noted that Geekbench results are not always completely accurate, at least for until there is official information from the manufacturer.

samsung SM-G986B	
427 Single-Core Score	2326 Multi-Core Score
Geekbench 5.0.3 for Android AArch64

Previously, there were many interesting information about the valuable hardware devices that will appear on the Galaxy S11. It can be mentioned as the appearance of a 4-megapixel camera cluster with a resolution of 108MP and can support 5x optical zoom, an all-new 'SAMOLED' panel with a refresh rate of up to 120Hz. Not only that, the Galaxy S11 is also rumored to be one of the fastest charging smartphones in the world with the presence of the EP-TA800 charger that supports 45W fast charging.

Although it is still too early to talk about the exact launch date of the Galaxy S11, Samsung has traditionally held the Unpacked event for the third week of February, February 18, 2020, which is also the event. that manufacturers take advantage of to launch Galaxy S. flagship.
