

Galaxy Watch 3 smartwatch highlights

Galaxy Watch 3 is equipped with state-of-the-art health monitoring technology, a formal design, flexible rotation and drop detection right on the user's wrist ...

Convenient health monitoring technology

Samsung brings the Galaxy Watch 3 with outstanding health monitoring features, not only helping users stay on top of their health, but also helping to build a healthy and balanced lifestyle.

The first is an electrocardiogram (ECG) function, which allows the watch to detect signs of atrial fibrillation just like an Apple Watch. The presence of a SpO2 sensor will help users receive a notification of sleep disturbance - a common symptom of sleep apnea. The watch also provides on-demand VO2 Max reading, suitable for people who run as much as athletes.

Users also receive stress assessment, sleep quality, sync with Samsung Health to help track the menstrual cycle . Especially manage 40 different types of exercise exercises, in which There are 7 activities that can be automatically tracked, meaning the user won't have to choose what kind of exercise he is doing before. Additionally, the Galaxy Watch 3's motion detection sensor can invoke emergency services when it detects a user falls.

Luxurious design, flexible bezel

Galaxy Watch 3 carries a formal design with a classic watch style, which makes it possible to carry the watch on hand as a fashion accessory. The rose copper frame is made from stainless steel and titanium, and is designed with a mix of brushed and polished steel.

The physical edge of the bezel allows the user to perform the operation more easily

Physical bezel rotating bezel offers great flexibility. The dial operation works well with both side buttons and offers a great alternative to swiping or trying to poke at a circular screen with your finger. The bezel has a slim design that creates a feeling of wearing much better than the previous physical bezel watch models of Samsung.

Compatibility and high capacity battery

Compatibility with other products in the Galaxy ecosystem for a seamless experience, the LTE version using eSim offers phone-free calling and texting. Although Tizen OS has a limited library of third-party options, there are enough main programs like Uber and Spotify for users to use.

The battery on the Galaxy Watch 3 has a high capacity of up to 340 mAh allowing the watch to be used continuously for many days.

The battery on the Galaxy Watch 3 allows users to use it for several days

More importantly, when the Galaxy Watch 3 needs to be recharged, users can use the watch's proprietary charger or via sharing the wireless charging source with a compatible Samsung phone.

Currently, to attract users, Samsung is also cooperating with California Fitness & Yoga center to implement the program of "omnipotent assistant - balance of life". Participating in the program, users will receive a free Galaxy Watch 3 to experience the functions of tracking and analyzing the results of the training session in all Gym / Body Combat classes . Besides, users will have a chance to win a Galaxy Watch 3 through the check-in minigame in the classes above.
