

Gangnam Style causes YouTube to upgrade the counter

It has been a long time since we have heard much about Gangnam Style, but the truth is that there are still many people looking at this song on YouTube. Evidence is that Gangnam Style has just officially broken YouTube's view counter when passing the number of 2,147,483,647 turns, the largest number that can be stored by 32-bit integers.

It has been a long time since we have heard much about Gangnam Style, but the truth is that there are still many people looking at this song on YouTube. Evidence is that Gangnam Style has just officially broken YouTube's view counter when passing the number of 2,147,483,647 turns, the largest number that can be stored by 32-bit integers.

The YouTube developer is probably not thinking that there will be a day when this number is broken, like the 'Y2K' case in 2000.

Currently, the number of views of Gangnam Style has increased to 2,152,376,232 and continues to increase. Perhaps YouTube has fixed this error using 64-bit integers.

Somewhat confusing is this time, there are still many people looking for Gangnam Style again. Sometimes mothers are still using it to lure me to eat rice.
