

## Gateway T-6303v is different from class

Belonging to the mid-range segment, Gateway T-6303v is designed only for luxury laptops.

**Belonging to the mid-range segment, Gateway T-6303v is designed only for luxury laptops .**

Launched in January 2009, Gateway stirred up the domestic laptop market with powerful configuration products and different designs. The T-series is the company's latest product line, which owns all the features you need in a computer in a classy and classy look.

Gateway T-6303v with edge and flat blocks.

There are no charming curves like Acer "Mother", Gateway is more powerful with its edges and flat surfaces. Cold and deep colors combine very well with sharp lines. The row of metal buttons divided by "sweet" laser engraving lines are very unique features. Combining the array of seemingly opposing materials: glossy high-grade plastic and translucent scratched metal parts, T-series possesses luxurious, classy design and completely different from the "senior "same type.

14.1 "mirror screen with 2 thin screen edges, gives a wide screen feel, a larger workspace. The traditional keyboard with wide palm rest is comfortable. Trackpad with small dots makes it easy for users. More real-time look and scroll The multimedia key system sits just above, the volume button can light up to make it easier to control during the night . A series of simple enhancements brings interesting experiences and features

Differences for T-series.

Multimedia key system located right above.

The Gateway T-6303v has a configuration that is not too powerful but just enough for basic applications and achieves the ideal balance for two uses: work and entertainment.

T-6303v comes standard with Intel Duo Core T3400 2.16 GHz processor, 1 GB DDR RAM which allows good multitasking. Perfect storage with 250 GB large hard drive. Through testing, it works stably with office software such as Microsoft Office 2007 or Adobe CS3 image processor.

UltraBright 14.1 "screen technology with high contrast and sharp. Bright frame, wide viewing angle for beautiful and smooth image quality. It is easy to see, after belonging to Acer, screen technology Gateway's image has made tremendous improvements, erasing completely unattractive reviews on previous-generation Gateway screens, and the multimedia features of this product line are also greatly improved.

In addition to the convenience of multi-media keys above the keyboard, the T-series dual speaker system is quite good with strong bass, good quality compared to the same laptop speaker system. The touch system touches each step slightly uncomfortably when you want to increase or decrease the volume quickly. Intel X3100 graphics processor chip with dynamic memory can be up to 384 MB sharing when needed is sufficient for entertainment needs, watching regular movies but will be a weak spot for gamers.

Traditional style keyboard, which is arranged reasonably and quite well, the keys are lightly moderate so it does not cause fatigue or discomfort. Full multimedia system with 3 USB ports, audio / mic port, 5-in-1 card reader, outstanding DVD burner with exclusive technology for direct disc labeling of Flash Label.

This machine is selling in Vietnam market for over VND 10 million.

Gateway T-series operates smoothly. Through the heatsink on the side, we can see that the copper radiator is quite "big" so the T-series uses a smaller fan blade, so the noise is much reduced. In addition, the device's battery is also very good with nearly 3 hours of continuous operation.

Overall, the device has a youthful and luxurious design, just enough configuration for many objects and work purposes, long operating ability, attractive selling price. In Vietnam, this model has a price of VND10,035,000, not VAT.
