

Gateway's \$ 300 netbook

After laptops running on the AMD platform, Gateway introduced its second generation of netbooks for the second time with versions labeled Intel Inside.

LT1200 runs on Atom processor, Gateway's stylish fashion design with black and red colors.

After laptops running on the AMD platform, Gateway introduced its second generation of netbooks for the second time with versions labeled Intel Inside. The LT1200 has a 10.1-inch screen with the basic configuration of a netbook.

It uses Atom N270 processor, 1.6 GHz speed, LED backlit screen with 1,024 x 600 pixel resolution, 1 GB RAM, 160 GB hard drive and GMA950 integrated graphics card.

This model is equipped with a graphics card, integrated webcam, stereo external speakers, 3 USB 2.0 ports and 3 cell battery. This is an attractive product on the price, the device is sold at 300 USD (equivalent to 5.5 million), the black version is called LT2001u, while the red model is LT2021u.

Below are pictures of this model.
