

# **GCA Launcher, a launcher for Android GO with designs that incorporate Chrome OS and Pixel Launcher**

GCA Launcher is a friendly launcher developed by Nx Biotic, with a design inspired by Chrome OS and Pixel Launcher to expand the limited features of Android Go.

GCA Launcher is a friendly launcher developed by Nx Biotic, a senior member of the XDA-Developers forum, with a design inspired by Chrome OS and Pixel Launcher to expand Android's limited features. Go.

1. Please download Launcher Live Icons, an application that helps icons know how to dance extremely fancy and completely free
2. Experience CPL Launcher, like Pixel Launcher but with more features and completely free

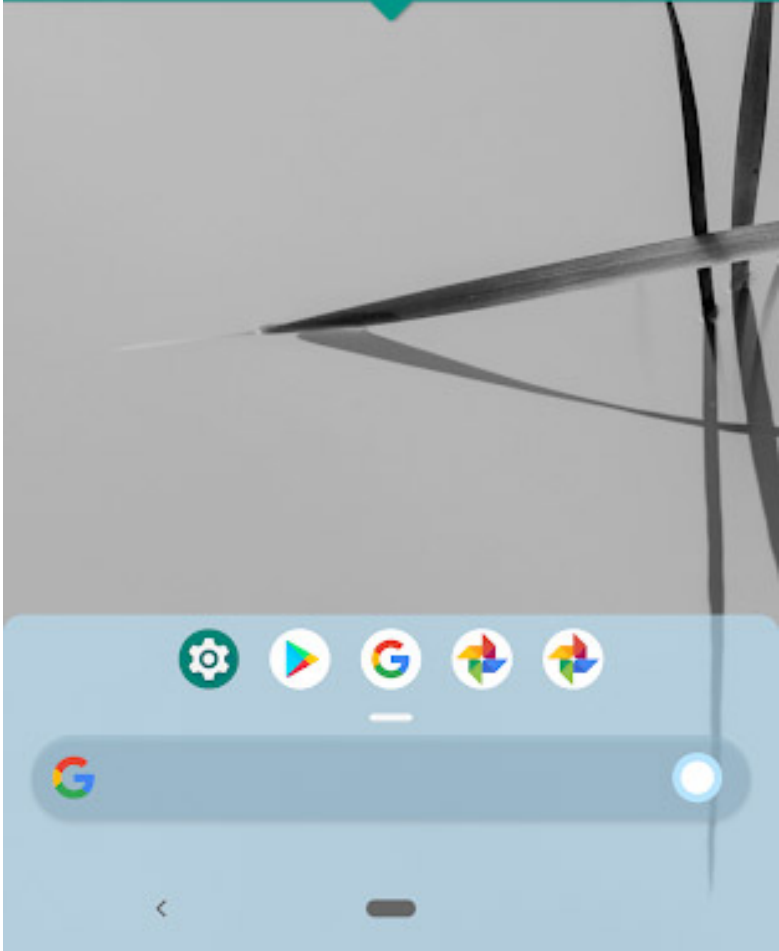

The application has a simple and friendly interface, the home screen has only one page with a single widget setup, multi-purpose search bar and some functional tweaks needed for the app drawer.

# Hello There

## Widget, wallpapers, icons and more

Touch & hold the desktop to access your settings. Drag up from the shelf to view your apps. Touch & hold on an app to open a popup menu. Add favorites to your shelf from the popup menu shortcut options. Search your app drawer, the web or the playstore for apps and products.

GCA Launcher has the ability to optimize battery life, reduce hardware consumption, make Android Go device work smoother.

In order to help users focus on what needs to be done on smartphones, GCA Launcher removes decorative details and replaces them with useful features such as setting icon packs, notification badges, and receiving

notifications. gesture type, action prediction and application. Therefore, although designed specifically for Android Go, GCA Launcher is compatible with all other Android devices.

Please download and experience GCA Launcher by following the link below.

1. GCA Launcher
