

Genshin Impact 2.6: 4 new points that gamers are most looking forward to

Genshin Impact 2.5 version is gradually coming to an end and the gaming community has begun to turn their attention to the 2.6 update.

New Area Unlocked

Genshin Impact 2.6 update will introduce to the gaming community a whole new land called The Chasm. It is known that the Abyss will have two different levels, Overworld and Underworld. Accordingly, Underworld will

have teleportation points as well as possess a much darker atmosphere than the Overworld.

If the Overworld will have a new domain to introduce players to new sets of holy relics, the Underworld's mines will have new enemies and creatures for players to explore and fight.

Story quests

Gamers can fully look forward to the development of the Traveler's journey in Genshin Impact 2.6 version. Besides, players will also have the opportunity to see some familiar faces in the Inazuma area.

One of the new story missions will bring gamers to experience the discovery of a new land "Deep Rock" - an area with a lot of historical significance of the people of Liyue.

Re-run banner

Similar to update 2.5, Genshin Impact 2.6 will also introduce players to two different Re-run banners. Although there is still no official information confirming the characters who will be featured in the upcoming Re-run banner, according to some leaked sources, we will be welcoming the return of Yoimiya, Ayaka, Kazuha and Venti.

New characters and weapons

New characters and weapons are always the focus of attention every time a new update is released. And the upcoming Genshin Impact 2.6 version will be the debut of Kamisato Ayato - a brand new 5-star character with the signature weapon "Haran Tsukishiro Futsu".
