The notable chest is one of the new additions after the launch of Tsurumi Island in Genshin Impact. The remarkable chest doesn't yield any other items, and the monsters guarding the chest aren't too hard to take down either.

Furthermore, the green color on these new chests helps them stand out a lot. If you want all the blueprints for Inazuma, you'll need to find and open all the notable chests on Tsurumi Island. However, the way it revives can confuse many people.

Players can also find some respawning chests at Shirikoro Peak, Chirai Shrine, and Autake Plains. The specific location of treasure chests on Tsurumi Island will be shown in the map below.
