

Genshin Impact: Location of the sakura trees in the quest Sakura Arborism

Genshin Impact: Location of sakura trees in Sakura Arborism quest, Guide to finding the location of all Thunder Sakura trees in Genshin Impact, help

Sakura Arborism is a world quest in Genshin Impact that requires the player to find all 5 Thunder Sakura trees. With other quests, the map will be the best tool to help gamers, but in Sakura Arborism, it is not useful at all.

Luckily, the 5 locations of the cherry pheasant are the same for all players, so everyone can use the images and instructions below to complete the Sakura Arborism quest.

How to locate sakura trees in the quest Sakura Arborism

Travelers can reach the site of the sakura trees in any order. All that matters is that the player uses Elemental Sight, enters the 3 blue areas and makes the lightning strike it.

Players need access to 5 Thunder Sakura trees to complete the quest Sakura Arborism. Then reach the tree and interact with the Retrieve Foreign Object prompt. The locations of the 5 cherry pheasants are:

1. North of Kujou Ruins.
2. South side of Kujou Ruins.
3. Near the northwest of the Statue of the Seven on Tatarasuna.
4. South of the northwest shift point at Tatarasuna.
5. West of the southernmost shift in Tatarasuna.

Thunder Sakura tree locations in the quest Sakura Arborism

Location of the first Thunder Sakura tree

The cherry pheasant tree lies outdoors, on the beach north of the Kujou Ruins. Given its design and surroundings, most players can spot it quickly. Travelers should note that there are two Electro Abyss Mages roaming this area, so people may have to deal with them before getting close to this tree.

Using Kujou Encampment's south teleport and then running north will get the player here quickly.

The second Thunder Sakura tree in Sakura Arborism

The next tree is located south of the Kujou Ruins. To get to this location quickly, use the east teleport point of the Seven Idols in Tatarasuna. Then, glide north to reach this area. Unlike the first tree location, people can easily get here without being detected by any nasty enemies.

The location of the third cherry tree

This cherry tree is the easiest to obtain in the Sakura Arborism quest. It is only a short distance north of the Seven Idols at Tatarasuna. Simply teleport there and look down from the cliff to find this third tree.

There are some enemies west of the tree, which will spawn reinforcements if the player gets too close. So be careful when approaching this Thunder Sakura.

The fourth cherry blossom tree in Sakura Arborism

The traveler will need to teleport to Tatarasuna's western teleport and climb a reasonable distance to find the fourth tree for the Sakura Arborism world quest. There are no notable enemies in this area, so gamers won't have much trouble dealing with this part of the quest.

The Fifth Sakura Thunder Tree in Sakura Arborism

The last tree is located west of the southernmost shift point in Tatarasuna. Travelers can simply glide from that teleport point and everyone will easily see this cherry lightning.

After the player trades with all 5 of these plants, return to Miyuki to continue the quest Sakura Arborism.
