Spiral Abyss is considered to be the hardest challenge to test how to build a Genshin Impact player's character. To defeat all enemies, gamers must strategically invest in their squad, especially when going further in Spiral Abyss.

The higher the player ascends to the upper floors of the Spiral Abyss, the more difficult the challenge becomes, and the 12th floor is the highest. In this article, let's learn the tips to get 9 stars in Spiral Abyss 12th floor and apply them to your playing strategy right away.

## Maximize physical strength

One of the least resource-intensive investments a gamer can make to get through all the floors of the Spiral Abyss is to maximize stamina.

Dodging enemy attacks is not easy even for experienced players. Only maxing out the stamina can make the character not vulnerable

People can do this by taking all the Oculi, leveling up the Statues of the Seven, and applying the Max Stamina Boosts in Genshin Impact. While this may take some time, the rewards are well worth it

## Attention to Ley Line Disorder

To get 9 stars on the 12th floor of Spiral Abyss pond, players need to pay attention to Leyline Disorder. On each floor, focus on team building and how Disorder powers up your enemies or characters.

The 12th floor now causes certain enemies to have a Honed Spirit effect, giving them 10% increased Health and all elemental resistances.

Adding the character that deals the most damage with a basic attack will break the enemy's physical elemental resistance.

## Using healing characters

Having a dedicated healer in the squad is a best strategy for all types of combat, including taking on the challenge in Spiral Abyss.

Since the 12th floor of the Spiral Abyss is filled with high damage enemies, having at least 1-2 healers will give the player a better chance of survival.

Some of the best healer characters to choose from are Noelle, Bennett, Jean, Kokomi, and Diona. On the other hand, Kazuha is the most used character in Spiral Abyss 2.2.

## Break the shield

Lots of dangerous enemies with elemental shields. The player can see a smaller bar with different colors below the enemy's HP bar, indicating the strength of their shield.

It is extremely important to give the characters the ability to break any shield, in order to finish off enemies more easily. Currently, there are 5 types of breakable shields and many free characters to make this happen.

## Find out information about the enemy

The most important tip to get through the 12th floor Spiral Abyss is that the player needs different characters to solve every 'puzzle' in the Abyss.

Before you try to enter any floor, especially the top floor, don't forget to click on the room and research the opponents.

Many enemies have weaknesses that gamers can manipulate by choosing the right character. Moreover, everyone will have the basis to build the best possible battle formation on the 12th floor of the Spiral Abyss.
