

Genshin Impact: Yae Miko will debut with what characters and weapons in 2.5?

It's still 2 weeks until Yae Miko will officially debut in Genshin Impact, but the information surrounding this character's banner has been revealed.

In the recent livestream about the content that will be released in version 2.5 of Genshin Impact, gamers will officially have the opportunity to own the new 5-star character Yae Miko in the near future. Besides, two other 5-star characters that are also planned to be rerun in the later part of version 2.5 are Raiden Shogun along with Sangonomiya Kokomi.

In addition, 4-star characters will be featured with Yae Miko banners that will include the likes of Thoma, Diona and Fischl. These are all very good auxiliary characters for Yae Miko when both Thoma and Diona will create very good shields, but Diona can also support many squads thanks to her good healing ability. As for Fischl, this character can act as a secondary DPS with the ability to charge Rage for other members of the squad.

Meanwhile, the 5-star magic item dedicated to Yae Miko will be Kagura's True Intent along with the sword-shaped weapon, the Ban Nham End Luc, and the 4-star weapons are Tuyet Huyen, Chieu Tam and Vu Tai. In addition to the Table of Consequences that are very suitable for many characters, the remaining weapons are not very attractive and gamers do not need to spend Raw Stones for these items.

Currently, the above information has not been confirmed by miHoYo and is likely to change when the official banner is released. Initially, Yae Miko will be broadcast in the first part of version 2.5 and then the return of Raiden Shogun and Kokomi. With attractive banners like these, it is certain that gamers' lucky money will no longer be safe when version 2.5 is released in a short time.
