

# GifCam - Create animated GIFs from videos quickly and for free.

Using Photoshop, you can easily create animated images. However, GifCam is a utility software used to create GIF animations from existing videos or videos recorded using the software itself. Let's get started in the following article.

To create GIF animations, there are many software applications such as Photoshop , PhotoScape , or GIMP . In this article, TipsMake will guide you on how to create GIF animations from videos using GifCam. Please refer to our instructions.

*Step 1:* Download the application software (no installation required).

- Download: GifCam

After downloading, proceed with the software installation. GifCam's interface is quite simple, intuitive, and easy to use, even for beginners.

*Step 2:* Record a video with GifCam.

Launch GifCam, then adjust the size to fit the frame you want to record. Click Rec to record, and click Stop to stop.

*Step 3:* Customize the video.

To edit the video, press the Edit button; a window will open. Right-click anywhere in the window to open the menu, as shown below. Here you can change some options such as deleting certain frames from the video by selecting the "Delete This Frame" menu.

Here you can also insert text into the frame for notes by selecting "Add Text". Then write your desired text and drag and drop it to the appropriate place on the frame.

*Step 4:* Save the file as desired, or you can export it as an AVI file

. Step 5: Review the result of the video clip you just cut.

Step 6: Create your own text in your style. Follow Step 2 of the article. Open any typing program such as Paint, Word, Photoshop and adjust the frame, then press Rec to record, and click Stop to stop.

Step 7: Your animated signature result.
