Reasons why you can't change your Arena of Valor code.

There are only a few common reasons, for example, you entered an expired code, which is a common error and the most frequently encountered by players. Or it could be entering the wrong code; if the game code is case-sensitive, you should enter each letter correctly.

Additionally, trying to redeem the same code twice will also fail. Usually, you'll paste the code or redeem a series of codes before entering the game to claim your reward. This way, you won't keep track of which codes you've redeemed, so when you redeem a code, you might accidentally redeem all the gift codes you've already redeemed.
