

# Give you a 45% discount coupon when buying a logo on DesignEvo

DesignEvo specially gave TipsMake.com readers a 45% discount coupon when designing and buying logos on the DesignEvo.com website.

Designevo.com is a very useful online logo design website. With a lot of topics, logo templates are available for you to choose, customized to create logos, brand identity for businesses, their products are fast and professional.

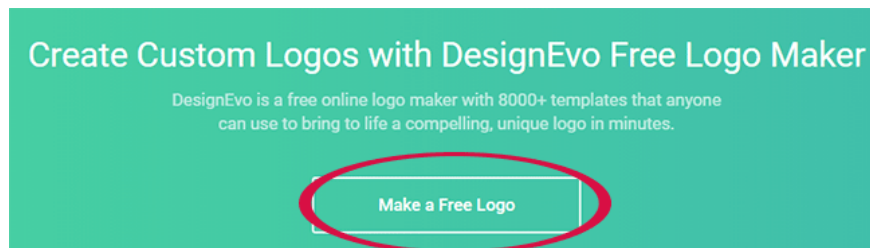

TipsMake.com has a free logo creation guide with Designevo.com. However, with the free version, after designing the logo, you can only download it at 500x500px. If you need a bigger logo, or buy a logo to download it, use it as you want.

DesignEvo is very thoughtful when creating 2 .jpg and .png files for the logo you just created, compressing them into a .zip file for faster download. With each logo there will be 2 payment levels, because the price is not fixed, so I call it low price and high price. With the logo you have bought, you can download the file up to 5000x5000px, editable and reloadable, with vector file. At a higher price, you can download the font on the logo and own the copyright of the logo.
