About Golden Spatula

For those who have never played Teamfight Tactics, we would like to introduce you to Golden Spatula, where players need to maximize their tactical intelligence to recruit generals from a random group of 5 generals, then build the strongest squad. Equip a variety of items, including the legendary item Golden Spatula.

In each match, eight players will use their squads to engage in 1v1 battles, gradually eliminating opponents until the final winner is found.

Originally derived from the game Truth Arena, which is a famous auto chess game with champions from League of Legends, Golden Spatula is customized to better suit the mobile platform with:

1. Special features for smoother experience.
2. Crisp, clean images optimized for small screens.
3. Unique and distinct personalization items with DTCL, bringing freshness and individual style to each player.

In addition to providing the latest sets updated periodically from TFT, Golden Spatula also creates a more accessible, mobile-friendly tactical experience, while still retaining the familiar tactical depth.
