

# Good conditioning models, affordable prices help you cope with the hot summer

Model air conditioner cheap, power saving, there are many smart features below will help you resist the hot, hot summer.

In recent years, the North and Central Vietnam have experienced the record hot days of over 41 degrees C. According to experts of the Institute of Meteorology, Hydrology and Climate Change, the cause of This peak heat wave may be due to El Nino phenomenon affecting Vietnam and climate change.

The weather is hot and prolonged, making the heat background increase, making our bodies more susceptible to respiratory diseases or skin and cardiovascular diseases. Besides, the hot weather makes our body produce more sweat, which causes the body to lose water and essential electrolytes. Hot sunshine is especially dangerous for the elderly and young children.

## 1. How to cool your home, cool your body during a hot summer day

These are the two subjects with poor resistance, so we need to pay special attention to avoid suffering from dangerous diseases of this weather.

Currently on the market there are many types of air conditioner rich and diverse models, types that many consumers will find it difficult to choose for their families the most satisfactory air conditioner to save power for family. If you are wondering what kind of air conditioner is suitable, read the article below for your family's reference. These regulators are one-way, which is about 9,000 BTU.

1. Do not worry "evaporate money" when using air conditioner to release gas
2. Things to consider using air conditioner for babies in the cold season
3. Wrong habits when using air conditioning

## 1. Air conditioner LG S12ENA

**INVERTER V**

**10** năm  
**BẢO HÀNH**  
**MÁY NÉN**

In 2017, 100% of LG's air conditioner will be launched using Inverter, this is a new breakthrough of LG Electronics to become the first electronics company in Vietnam to universalize Inverter technology to air conditioner products. Inverter air conditioners have competitive prices, encouraging consumers to gradually switch to this advanced technology. In addition, these LG air conditioners are also integrated with Smart Inverter technology to actively control energy, saving up to 70% of power consumption compared to conventional air conditioner. In addition, this air conditioner model effectively deodorizes the 3-layer filter to make the air more fresh. Especially the product has warranty period of up to 24 months.
