

Good tips in Yahoo! Mail

This article will guide some good tips to help you use this webmail service more effectively and conveniently.

Here are some good tips to help you use Yahoo! Mail is more efficient and convenient.

Delete spam messages faster

By default, after a month, new spam messages are Yahoo! Mail deleted. This both makes your spam mailbox more cumbersome and also makes it more difficult to manage it (because sometimes Yahoo does not send spam messages into spam, if there are too many messages, filtering messages should be more time consuming). So, set up Yahoo! Mail deletes spam messages faster by going to **Options > Mail Options > Spam** , in the *Empty Spam folder* , select the time to delete spam mail is **once a week** . *Block images section* you select **Always show images, except in Spam folder** to Yahoo! Mail always displays images in messages, even with messages in the spam folder.

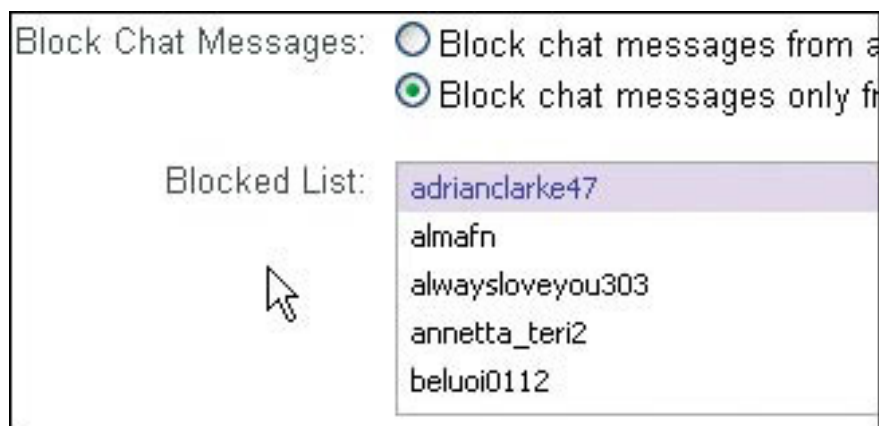

Block emails that do not want to receive mail

Gmail and Hotmail only have the ability to send messages of disruptive emails into the trash, not the ability to block messages from those email addresses. Yahoo! Mail provides a solution for you to block email from anyone you don't like. To do so, go to **Options > Mail Options > Spam** , in the *Add a blocked address box* enter the email you want to block and click **Add** . You are allowed to block up to 500 emails at once. To stop it, click on it and click **Remove** .

Stop blocking nick but can't chat

Previously you blocked someone nick in Yahoo! Messenger, now you don't block their nick anymore but still can't chat with them in Yahoo! Mail can still chat with them normally in Yahoo! Messenger. The reason this is because their nick is still in the 'black list' of the chat application in the email. If you want to chat with those people, go to **Options > Mail Options > Spam** , in *Blocked Chat IDs box*, you will find them and click **Delete** to delete it from the list. At this point, you can chat with them normally.
