

Google artificial intelligence will redraw your image in a new, strange way, try it out

When you upload a photo, the subjects in the photo will be used by Cartoonify using Google's artificial intelligence to render in a very funny graffiti-style.

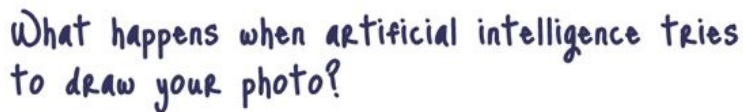

In addition to Google AutoDraw, a tool that uses artificial intelligence to be able to automatically draw other details according to the theme that the user originally drew, Google also has another equally interesting drawing tool: Cartoonify. When you upload a photo, the subjects in the photo will be used by Cartoonify using Google's artificial intelligence to render in a very funny graffiti-style.

Using Cartoonify is extremely easy, including the following steps:

Step 1: Access Cartoonify using the link below.

1. Cartoonify

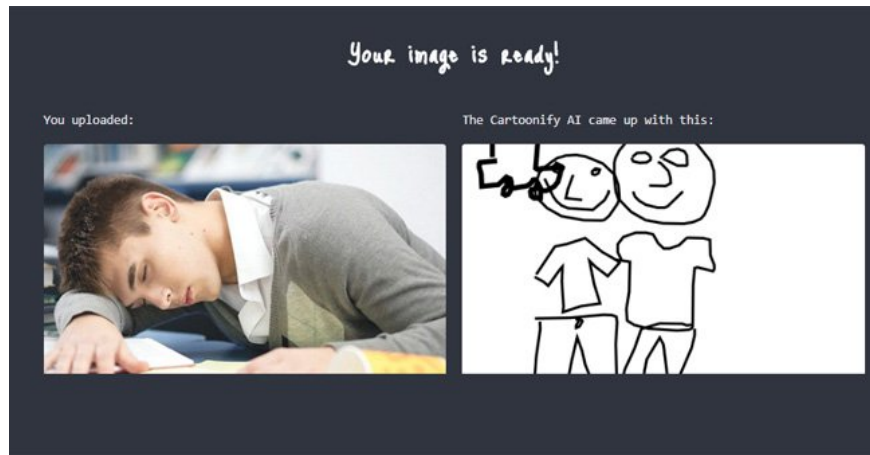

Step 2: Select the image you want to redraw, then click **Upload** or you can copy the image URL and paste it into the box next to it.

Cartoonify turns your photo into a cartoon drawing, powered by Draw This Macnish and the Google QuickDraw dataset. Upload any image below to try i

[or try a sample!](#)

Step 3: After uploading, artificial intelligence will need a few seconds to process the image.
