

# Google Assistant has appeared on Xbox One with many interesting gadgets

Xbox One is the latest device to join the Google Assistant intelligent support list.

Xbox One is the latest device to join the Google Assistant intelligent support list. Microsoft and Google recently announced the Xbox Action 'project', which allows owners of Xbox One models to use any smart speaker device, smart display or mobile device (iOS). or Android) that supports Google Assistant to control Xbox One with voice commands.

As such, users can use the commands to ask Google Assistant to launch the game, adjust the volume, take screenshots, start broadcasting and many other utilities on Xbox One.

1. Microsoft released an emergency security patch, urging Windows users to install now

*Xbox Action is the latest collaboration plan between Google and Microsoft*

Xbox Action will launch a beta version starting today, September 27 with an English option and users can use 'any feature supported by Google Assistant'. Google said it hopes Xbox Action will be able to support more language options in the near future.

"With Google Assistant already on the Xbox, we're delighted to be able to provide gamers with a smart and diligent companion / virtual assistant in every situation. We will also promote closer cooperation with Microsoft to continue to improve the service experience over time, providing the ability to use virtual assistants even more flexibly. The ultimate goal is nothing more than to optimize the experience play everyone's game with the Xbox ', Google's senior product manager, Gabriel Rubinsky, said in a blog post.

1. Microsoft revived PowerToys, a popular customization tool on Windows 95 / XP

### *Xbox One can now be managed through Google Assistant*

In addition to the ability to turn on and off the application as mentioned above, Xbox Action can also start video recording mode or take screenshots (command: 'Hey Google, take a screenshot on Xbox'), find Search for titles, play and pause videos on Xbox One X or One S.

Here are some basic commands currently supported:

1. 'Hey Google, play [game] on Xbox.'
2. 'Hey Google, turn on Xbox'
3. 'Hey Google, turn off Xbox'
4. 'Hey Google, launch YouTube on Xbox'
5. 'Hey Google, pause on Xbox'
6. 'Hey Google, resume on Xbox'
7. 'Hey Google, volume up on Xbox'
8. 'Hey Google, take a screenshot on Xbox'

*Before that, the Xbox was equipped with compatibility with Amazon Alexa and Microsoft Cortana*

1. Microsoft announced the official name for the Windows 10 20H1 update

Before adding the ability to support Google Assistant, Xbox has also been equipped with compatibility with some other famous virtual assistants such as Amazon Alexa and Microsoft Cortana. These voice command options allow gamers to use Windows 10 PCs, Amazon Echo devices, Harman Kardon Invoke, Sonos One or Cortana and Alexa applications on iOS and Android to control their Xbox consoles. in the way above - extremely convenient.
