

# Google Assistant surpasses Siri, Alexa and Cortana, becoming the smartest virtual logic today

Recently, researchers have conducted tests to see which virtual assistants are the smartest through IQ tests. The assessment results are based on understanding the questions, the content provided and the accuracy of those answers.

Virtual assistants are becoming smarter and more applicable in our lives. Currently popular virtual assistants are Assistant (Google), Siri (Apple), Cortana (Microsoft) and Alexa (Amzon).

Recently, researchers have conducted tests to see which virtual assistants are the smartest through IQ tests. The assessment results are based on understanding the questions, the content provided and the accuracy of those answers.

The results showed that the virtual personal assistant of the Google search giant is the smartest, easily surpassing Alexa, Cortana and Siri in tests.

## Query Results

	Answered Correctly		Understood Query	
	Apr-17	Jul-18	Apr-17	Jul-18
Google Assistant	74.8%	85.5%	99%	100%
Siri	66.1%	78.5%	95%	99%
Cortana	48.8%	52.4%	97%	98%
Alexa	n/a	61.4%	n/a	98%

The results of the intelligent tests of virtual assistants.

From the above results table, it can be clearly seen that in the period of more than 1 year from April 2017 to June 2018, all virtual assistants have made significant progress. In terms of ability to understand questions, there is no difference between virtual assistants. Google Assistant can understand 100% of the total 800 questions are asked, other assistants also achieve very high index.

Regarding the accuracy of the answer, the Google Assistant stands out, reaching 85.5%. Alexa, when Amazon's virtual assistant surpassed Cortana with 61.4% accuracy.

## Queries Answered Correctly by Category

The graph of the number of questions answered according to each item of virtual assistants.

With the questions in each section, Google Assistant has been surpassed by Siri in the "Order" section.

These impressive results show that virtual assistants are able to fully understand human questions and they can overcome all limitations to be used every day.
