

# Google Dashboard - Everything Google knows about you

On November 5, Google officially launched Dashboard service, which gathers all the information that users have sent in other Google services.

**On November 5, Google officially launched Dashboard service, which gathers all the information that users have *sent* in other Google services.**

Google is increasingly "rooted" into the daily habits of web users with more than 20 online services of all kinds, but there is a question that many people often ask: What does Google know about them? And the introduction of the new Dashboard service is the most accurate answer.

Just login once with your Google account via [Google.com/dashboard](http://Google.com/dashboard) all Google services that the user is using such as Gmail, Picasa, Calendar, Google Docs, YouTube, Gtalk . will be listed. Fully list with the latest details and information and allow users to 'jump back and forth' between services quickly.

All your clicks are recorded by Google (*Artwork*)

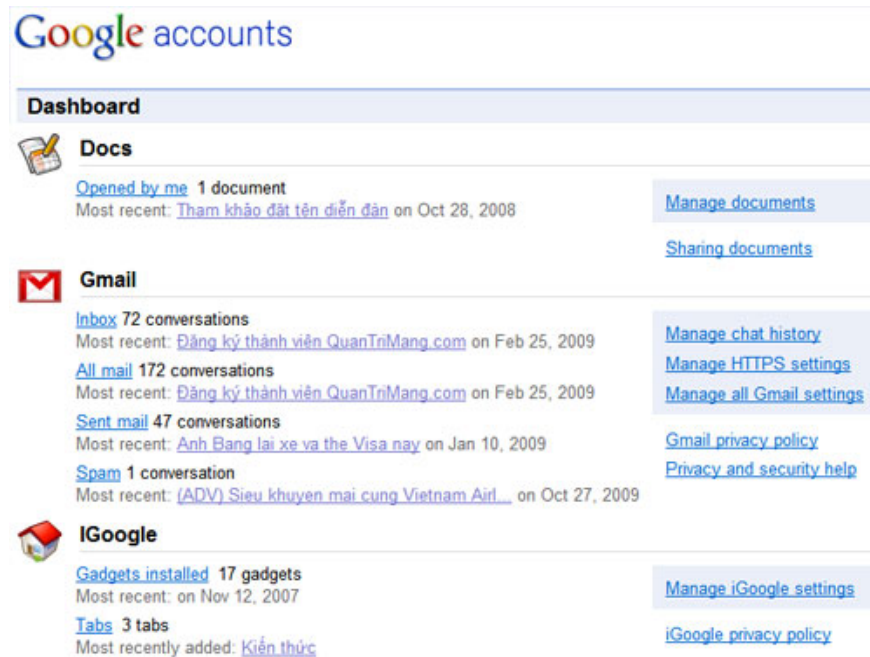

How many emails, contacts in your Gmail account, how many photo albums and how many photos have been uploaded to Picasa, how many posts and friends do you have on blogspot or even have you searched for

something? and which websites to access via Google Search . The answer is in the Dashboard.

According to Google's statement, through Dashboard users can control, allow ads in any format, topics are allowed to display in their accounts. ' *Selecting and controlling ads from users has become* ' Google's 'philosophy ' , the giant sought a statement on its official blog.

Google also said that this is the most *transparent and public service built by an Internet company* and they also expect that transparency will become the standard of the web world from now on.

You can better understand this service through the following video:

Information is stored in great detail
